

**EXPLANATORY MEMORANDUM TO
THE WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT REGULATIONS
2013**

2013 No. 3113

1. This Explanatory Memorandum has been prepared by the Department for Business, Innovation and Skills and is laid before Parliament.

The memorandum contains information for the Joint Committee on Statutory Instruments.

2. Propose of the instrument

2.1 These Regulations transpose the main provisions of Directive 2012/19/EU ("the Directive") on waste electrical and electronic equipment (WEEE) which recasts Directive 2002/96/EC.

2.2 The main purpose of the Directive is the protection of the environment and human health. It provides that producers of electrical and electronic equipment ("EEE") will be financially responsible for managing the waste that arises from products they place on the Union market. This policy is intended to promote greater efficiencies in the management of waste from this type of equipment. Producers must also be registered with the national authorities in any Member State where they place EEE onto the market either directly or by appointing an authorised representative to act on their behalf. The Directive provides that Member States must establish systems for the collection, treatment, recovery and environmentally sound disposal of most types of waste electrical and electronic equipment ("WEEE"); and that the costs of these systems must be largely borne by the producers of such equipment. Distributors of EEE also have obligations under the Directive to establish systems for the return of WEEE from private households (i.e. from consumers) free of charge.

2.3 These regulations provide for all WEEE that arises in the United Kingdom to be collected at designated collection facilities ("DCFs") (DCFs are usually local amenity sites) and transported to an approved authorised treatment facility ("AATF") or approved exporter for treatment, recovery, recycling or reuse. They also provide for the registration of all producers who put EEE on the market in the United Kingdom and for the establishment and financing by producers of systems to collect, treat, recover and dispose of WEEE that arises in the United Kingdom. Most producers will discharge their obligations through membership of a producer compliance scheme. Producers that place less than 5 tonnes of EEE onto the market in a year will discharge their obligation by registering with the appropriate authorities. Distributors are required to take back certain types of WEEE free of charge. These regulations also provide for the approval of DCFs, producer compliance schemes, authorised treatment facilities and exporters.

2.4 These regulations also provide for a wider range of products to be covered by the Directive with effect from 1st January 2019, as required by the Directive.
