**University English for Academic Purposes in China** Xiaofei Rao,2018-07-07 This book uses an in depth phenomenological interview approach to explain the generational characteristics of today s Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings By presenting the authentic voices of the recruited participants the book clarifies how English for academic purposes EAP as an emerging global phenomenon and a research informed practice enables and empowers them for conscious self transformation and critical awareness development through language study The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP and discusses university English language learners learning needs and rights The book further promotes a dynamic and

transformative University EAP pedagogy of particularity practicality and possibility moving from the oppression of language education to its liberation and the increasing critical consciousness among the present and future university youths in a time of great social changes      Brazil International Monetary Fund. Monetary and Capital Markets Department, 2018-11-30 The financial system has been resilient through the severe recession Banks and investment funds dominate Brazil's financial system landscape The banking sector has continued to be well capitalized profitable and liquid Profitability has been supported by prudent lending standards high interest margins and robust fee income despite record loan losses Outstanding nonperforming loans have increased marginally during the recession largely because banks have actively written off bad loans The investment fund industry has also been solid enjoying a steady growth of assets under management without experiencing net outflows in aggregate during the recession Market based indicators point to relatively low levels of systemic risk in 2017 However the outlook for the nonbank sector will become more challenging in the environment of lower interest rates as lower returns will affect investment income and a search for yield may increase risk taking      *Current Law Index*, 1993      **The Cat - E-Book** Susan E. Kirmani,Ashok K. Shetty, Lee A. Shapiro,2019-02-06 Status Epilepticus SE is a neurological emergency and has high morbidity and mortality The International League Against Epilepsy ILAE recently updated their definition to specify that SE is a condition resulting either from the failure of the mechanisms responsible for seizure termination or from the initiation of mechanisms which lead to abnormally prolonged seizures Such phenomena can lead to long term neurological complications due to neuronal death glia neurological injury aberrant neuroplasticity oxidative stress and inflammation and alteration of neuronal networks Depending upon the type and duration of SE these mechanisms are quite variable Therefore in response to the updated definition of SE novel avenues of research are required to address the specified involvement of the underlying mechanisms and pathophysiology resulting in the development of and outcomes from SE Improving the basic science understanding of SE will facilitate essential clinical trials One can envision such experiments to include device and compound based technological interventions directed at aborting the seizure activity and improving clinical outcomes Benzodiazepines remain one of the cornerstones of treatment and studies are underway to study new delivery options including intranasal buccal and intramuscular midazolam in addition to rectal diazepam with the goal of aborting the seizure activity outside the hospitals as rapidly as possible Approved and off label anticonvulsants such as phenytoin phenobarbital valproate topiramate levetiracetam lacosamide steroids immunosuppressants and neuroprotective compounds have also shown some efficacy at treating SE However substantial challenges remain in optimally managing SE and minimizing the short and long term complications Such difficulties can be overcome by innovative approaches targeting the underlying mechanisms of neuronal excitability glia neuronal death neuroplasticity oxidative stress inflammation and neuroinflammation Global Pandemics and International Law Ilja Pavone,2023-12-19 This book reviews the efficacy of Global Health Law assessing why its legal framework based on the International Health Regulations did not represent a valid tool in the containment of modern global pandemics such as COVID 19 The book provides an introduction to the international legal framework surrounding epidemics and pandemics and the main global governance issues that have been generated by the COVID 19 outbreak It highlights the main shortcomings of Global Health Law while also including practical proposals to improve the WHO s mechanism to prevent and respond to future disease outbreaks such as the New Pandemic Treaty Emphasis is placed on what has not worked in the international regional and national responses to COVID 19 It is argued that the pandemic has shed light on the weaknesses of global and domestic health law By identifying legal gaps and

providing legal arguments the book contributes to the historical and conceptual foundation as well as the practical development of international law in the new age of COVID 19 with the ultimate goal of stimulating legal reform in this vital new era The work will be essential reading for academics researchers and policy makers working in International Law Health Law Environmental Law Human Rights Law Biolaw and the Law of International Organizations Index to A.S.T.M.
