Grade 1 November 2014 Mathematic Paper 2:

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers' guides across 13 countries and 19 projects. Using quantitative and qualitative methods, we examine how teachers' guides across the projects differ and find substantial variation in the design and structure of the documents. We develop a scripting index so that the scripting levels of the guides can be compared across projects. The impact results of the programs that use teachers' guides show significant impacts on learning outcomes associated with approximately an additional half year of learning, showing that structured teachers' guides contribute to improved learning outcomes. During observations, we find that teachers make a variety of changes in their classroom instruction from how the guides are written, showing that the utilization of structured teachers' guides does not create robotic teachers unable to use their own professional skills to teach children. Unfortunately, many changes that teachers make reduce the amount of group work and interactivity that was described in the guides, suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide. The report includes a set of research-based guidelines that material developers can use to develop teachers' guides that will support effective instructional practices and help improve learning outcomes. The key takeaway from the report is that structured teachers' guides improve learning outcomes, but that overly scripted teachers' guides are somewhat less effective than simplified teachers' guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide.

Daily Graphic Ransford Tetteh, 2014-09-19 [Using Peer Tutoring to Improve Reading Skills](#) Keith Topping, David Duran, Hilde Van Keer, 2015-10-08 *Using Peer Tutoring to Improve Reading Skills* is a very practical guide offering a straightforward framework and easy-to-implement strategies to help teachers help pupils progress in reading. A succinct introduction shows how schools can make positive use of differences between pupils and turn them into effective learning opportunities. Outlining the evidence base supporting peer tutoring approaches, it explores the components of the reading process and explains how peer tutoring in reading can be used with any method of teaching reading. Core topics covered include Planning and implementing peer tutoring, Getting your school on board, How to structure effective interaction, Training peer tutors and tutees, Paired Reading, cross-ability approaches, One Book for Two, fostering fluency, reading comprehension and motivation, Reading in Pairs, cross- and same-year tutoring, Supporting struggling readers, Involving families in peer tutoring, Evaluation and feedback. Illustrated throughout with practical examples from diverse schools across Europe, *Using Peer Tutoring to Improve Reading Skills* is an essential introduction offering easy-to-use guidelines that will support teachers in primary and secondary schools as they enhance pupil motivation and improve reading standards.

Child Development From Infancy to Adolescence Laura E. Levine, Joyce Munsch, 2023-05-12 Chronologically organized, *Child Development from Infancy to Adolescence*, Third Edition, introduces topics within the field of child

development through unique and engaging Active Learning opportunities *ECGBL2015-9th European Conference on Games Based Learning* Robin Munkvold and Line Kolås, 2015-09-18 These proceedings represent the work of researchers participating in the 9th European Conference on Games Based Learning which is being hosted this year by Nord Trondelag University College Steinkjer Norway on the 8-9 October 2015. The Conference has become a key platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different areas and specialties within Games Based Learning. It also offers the opportunity for like-minded individuals to meet, discuss and share knowledge. ECGBL continues to evolve and develop and the wide range of papers and topics will ensure an interesting two-day conference. In addition to the main streams of the conference, there are mini tracks focusing on the areas of the design of multiplayer collaborative serious games, applied Games and gamification, the teacher's role in game-based learning, games for STEM, Science, Technology, Engineering, Mathematics, learning assessment of digital game-based learning and pervasive and ubiquitous gaming for learning. In addition to the presentations of research, we are delighted to host the third year of the Serious Game competition which provides an opportunity for educational game designers and creators to participate in the conference and demonstrate their game design and development skills in an international competition. This competition is again sponsored by SEGAN Serious Games Network. With an initial submission of more than 60 games, 28 finalists will present their games at the conference. Prizes will be awarded to the games judged to demonstrate the best quality and originality of game play itself and the positioning and articulation of the game's contribution to the educational domain. With an initial submission of 190 abstracts, after the double-blind peer review process, there are 75 research papers, 15 PhD research papers, 4 Non-Academic papers and 8 work-in-progress papers published in these Conference Proceedings. These papers represent research from more than 40 countries including Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Israel, Italy, Japan, Malaysia, Norway, Portugal, Russia, Saudi Arabia, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, ROC, The Netherlands, The Netherlands United Arab Emirates, UK and USA.

Industrial Waste Herbert Pöhlmann, 2021-08-23 Industrial residues are obtained from all treatments of raw materials in industry during the process of mining, raw materials treatment and final usage. During these processes of enrichment, optimization and utilization of raw materials, only part of the original material can be used for the dedicated application and some left-over parts remain. This contribution focuses on residues like mining overburdens, ore residues and ore processing residues like slags, but also on incineration ashes and water purification muds. Natural materials like pozzolanes, due to their potential of CO₂ reduction, are also included. Based on this knowledge, secondary reusable materials, due to their chemical, physical and mineralogical properties, can be identified. Also, different characterization methods for analysing the potential for further application of these residues are included.
