the result is affected by personal inefficiency there is no ground for discussion On the other hand the more confidence an engineer reposes in his own capabilities the more critical and exacting he becomes concerning each inscrutable detail of construction for which the maker alone is responsible The instinctive tendency in every high class man is toward higher class results partially accomplished at least through the elimination of time or patience lost in unstable instruments To extend the boundaries of popular knowledge on this subject to provide a ready reference in relation to instruments of our own manufacture and to give our customers the best there is in value and treatment without their insistence is the excuse and necessity for the publication of this the ninth enlarged and revised edition of the Saegmuller Vest Pocket Handbook About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
