

# GEOMETRY PERFORMANCE TASK

## Area, Perimeter, and Angle Measures

Name \_\_\_\_\_

In Coonstown, USA, all the streets run perfectly north-south or east-west, except Main Street, which runs across Main Street to create a  $20^\circ$  angle at the NW corner (labeled on diagram).

- Water Street is exactly 800 yards north of Coonhound Ave.
  - It is exactly 1000 yards from Main Street due east to the river.
  - If you are at the corner of Main Street and Water Street, it is only 750 yards due east to the river.
- ❶ Label the drawing with the above measurements, including what you know about the angles.

You have been commissioned to build a park on the piece of land that is bordered by Water Street, Main Street, and Coonhound Ave. As part of your plan, you are building a rectangular deck that stands out over the water (this is already shown on the diagram).

- ❷ Shade in (lightly please) the region that is the park (including the deck).
- ❸ The Mayor would like to know how big the park will be (including the deck) so that he can write a press release. What will you tell him? Show and explain your work!

*Assessment Standards for School Mathematics* National Council of Teachers of Mathematics, 1995  
This document was created because of the need for new assessment strategies and practices to be developed to enable teachers and others to assess students performance in a manner that reflects the NCTM s reform vision for school mathematics Instead of assuming that the purpose of assessment is to rank students on a particular trait the new approach assumes that high public expectations can be set that every student can strive for and achieve that different performances

can and will meet agreed on expectations and that teachers can be fair and consistent judges of diverse student performances The first sections of the document discuss six mathematics assessment standards 1 The Mathematics Standard 2 The Learning Standard 3 The Equity Standard 4 The Openness Standard 5 The Inferences Standard and 6 The Coherence Standard The use of the assessment standards is then discussed in the context of different purposes such as monitoring students progress making instructional decisions evaluating students achievement and evaluating programs The next section discusses what should happen next with regard to mathematical assessment The document concludes with a glossary and a selected assessment bibliography with 116 citations Contains 28 references MKR     Integrated Curriculum H. Lynn Erickson, Association for Supervision and Curriculum Development, 2003     Performance Assessment Brian McLean Semple, 1992 The second International Assessment of Educational Progress focused on the mathematics and science achievement of 13 year olds Performance assessments were used as part of the overall assessment in four countries England Scotland Soviet Union and Taiwan and five Canadian provinces The performance assessment approach drew heavily on the experience of the United Kingdom in such assessments but added features to meet the needs of an international study The performance tasks required students to apply concepts observe measure manipulate equipment and materials and record and interpret data Approximately 3 000 students participated in the 1991 mathematics and science assessments Scores varied widely from task to task and from country to country Relative performance of countries and provinces generally differed from those identified by written curriculum based tests A major lesson learned from the experimental test administration is that this form of performance assessment can be used reliably in international comparative studies although at an estimated cost three to four times greater than that for an equivalent number of written test questions Sample mathematics and science tasks are included and there is an appendix on problem solving in mathematics that describes outcomes produced by Scottish students SLD     *Performance Standards* New Standards (Organization), 1998     *A Unified Framework of Methods for Evaluating Visual Performance Aspects of Lighting* International Commission on Illumination, 1972     *Performance Standards: High school* New Standards (Organization), 1997 Presents clear expectations for student achievement and more than 200 examples of student work Each volume contains standards for language arts mathematics science and applied learning The FREE video contains student work samples and commentaries to illustrate speaking listening and viewing sections of the English Language Arts Standard     Model-based Performance Assessment Eva L.
