1. Wait 10–15 seconds after turning the power to the 630 and the rest of your components on before turning the volume up. This will permit all circuits to stabilize, thus reducing the risk of damage.
2. Always make sure that the power to the 630 and your power amplifier is off before performing interconnections, especially loudspeaker and phono cartridge connections. You may otherwise cause serious damage to your amplifier and/or loudspeakers.
3. It is highly recommended that you reduce the volume to a low level before switching sources or changing stations, even with the interstation muting on. Sudden introduction of a loud signal source may damage your loudspeakers.
4. Never connect components, the total power consumption of which exceeds 350 VA, to the auxiliary AC outlets on the rear panel of the 630.
5. Shorting plugs are supplied on the Phono and AUX input jacks. Leave them inserted unless the input is to be used.
