

Critical Thinking Essay

Critical thinking and decision making is the process to find the truth. An important aspect of thinking is the process that relies on the ability to coordinate and structure our ideas so that they make sense. Training our mind to use the critical thinking process gives people a better understanding of the information. This paper will discuss the three different thinking styles. It will also compare and contrast logical style, persuasive style, and creative style. Critical thinking will be applied to the decision making process by using work environment examples.

The logical style of thinking is a complex process in which reasoning is used to come to a conclusion. This style involves a sequence of steps or thoughts

used to solve a problem. According to Kirby and Goodpaster (2007), along with creative thought, inductive and deductive logic comprise the bedrock and substance of all our thinking. Using the two major elements of logical thinking, deductive and inductive reasoning, solutions can be tested with tried and true methods. This style is very distinct and follows a more structured and analytical path using proven methods in order to reach the conclusions.

When comparing logical thinking to the creative and persuasive styles of thinking, all three require detailed processes to reach conclusions. With the creative style, the conclusions are inspired by the ideas that can be gathered using metaphors, brainstorming and starbursting. While the persuasive style of thinking can incorporate biases, ~~emotion~~, motivation and even manipulation, it usually requires some sort of credibility to be successful.

Logical thinking affects the critical thinking process because it uses Deductive thinking which "is the kind of reasoning that begins with two or more premises and derives a conclusion that must follow from those premises, a conclusion" (Kirby and Goodpaster, 2007) and inductive reasoning which "usually begins with a set of evidence or observations" (Kirby and Goodpaster, 2007). All three thinking styles are required in the critical thinking process in order reach a valid and sound conclusion.

In real estate, all three of these styles of thinking must be incorporated. For example, when taking on a new listing, a detailed step-by-step process must be followed. This series of paperwork is very straight forward and completed in sequential order. If this order is not followed correctly, company rules, association bylaws and even board ethics could be violated.

During the marketing phase, creativity is a must in today's world. The listing agent must ask many questions of the seller in order to present the property to the right audience and in the right manner.

When the time comes to show homes to a perspective buyer, the art of persuasion comes to play. The agent must make sure that the properties being shown appeal to the buyer's needs, wants, values and sometimes even egos.

The persuasive thinking style involves getting your audience to believe, go along, or act in accordance with what you want. With this style of thinking, if a person is an effective

 Franziska Trede, Celina McEwen, 2016-06-21 This book takes a fresh look at professional practice and professional education
 In times of increased managerialism of academic teaching and a focus on graduate learning outcomes it discusses
 possibilities to teach and learn otherwise A deliberate professional is someone who consciously thoughtfully and
 courageously makes choices about how to act and be in the practice world A pedagogy of deliberateness is introduced that
 focuses on developing the following four characteristics of professionals 1 deliberating on the complexity of practice and
 workplace cultures and environments 2 understanding what is probable possible and impossible in relation to existing and
 changing practices 3 taking a deliberate stance in positioning oneself in practice as well as in making technical decisions and
 4 being aware of and responsible for the consequences of actions taken or actions not taken in relation to the doing saying
 knowing and relating in practice *Educating the deliberate professional* is a comprehensive volume that carves out and
 explores a framework for a pedagogy of deliberateness that goes beyond educating reflective and deliberative practitioners
 As a whole this book argues for the importance of educating deliberate professionals because in the current higher education
 climate there is a need to reconcile critique thinking participation doing and moral responsibility relating to others in
 professional practice and professional education **50 Essays** Samuel Cohen, 2016-11-04 50 Essays A Portable Anthology is
 the best selling value priced reader in the country because its virtues don't stop at the price The book's carefully chosen
 selections include both classic essays and high interest high quality contemporary readings to truly engage students The
 editorial apparatus is flexible and unobtrusive enough to support a variety of approaches to teaching composition In its fifth
