Europe and Near East Region,1967      *Gifted Children* Leta Stetter Hollingworth,1926 The subject that is treated in this volume has engaged a large part of the attention not only of psychologists and educationists but also of laymen It is argued that if nature really endows some children intellectually much more generously than she does others and the data presented in this volume will convince any fair minded person that this is the case the fact is of importance to those who are interested in social advancement as well as to those teachers and parents who are striving to do the best they can for each individual committed to their care A large amount of scientific material is included in this book but it is presented in a straightforward clear interesting manner and it may be predicted that this volume will be read easily and with complete comprehension by parents teachers and laymen as well as by students of human development and of education PsycINFO Database Record c 2004 APA all rights reserved      **Community Assembly Mechanisms Shaping Microbiome Spatial or Temporal Dynamics** Daliang Ning,Stilianos Fodelianakis,Jianjun Wang,2022-07-14      *Mechanism, Life and Personality* John Scott Haldane,1923      *The Logic and Methodology of Science and Pseudoscience* Fred Wilson,2000 This book examines the various norms for the logic and methodology of science placing them in the context of the cognitive interests and explanatory ideals that motivate science Various themes in the philosophy of science are examined including the views of K Popper T Kuhn and L Laudan Characteristic cases of scientific theories are examined in order to illustrate and justify the proposed norms These include on the one hand the emergence of the science of Galileo Kepler and Newton from the older metaphysical style of explanation to be found in Aristotle and on the other hand Darwin s theory of natural selection Also included are characteristic cases of pseudoscience including creation science Lysenkoism Velikovsky UFOs and ancient astronauts

astrology parapsychology and various kinds of alternative medicine From these examples and the more theoretical discussion there emerges a series of norms for demarcating science and pseudoscience Various aspects of the scientific method are examined in detail including the role of hypotheses the logical structure of theories and how these relate to the experimental methods of John Stuart Mill collection for example what do we say about observational reports of the existence of UFOs In this context there is a discussion of some of the issues raised in the so called science wars It is concluded that the sociology of science can at times be helpful to the scientific community in improving their methods of investigation **Developing**
