Life Science P1 21 November 2014 Question Paper:

The Energy Mix for Sustaining Our Future Ahmad Vassel, David S.-K. Ting, 2018-12-29 This book gathers the proceedings of the Energy and Sustainability 2018 Symposium EAS 2018 held in Windsor Canada in June 2018. It brings together the state of the art on specific aspects of the current energy status and covers a wide range of energy and engineering systems from internal combustion engines to electric vehicles from the atmosphere solar and wind to underground geothermal and underwater turbines and energy storage. The book demonstrates how conventional internal combustion engines have advanced dramatically in terms of both performance and emissions over the past century. It also studies how life supporting elements such as water and greenhouses must be prioritized and protected to ensure a sustainable future. The book offers a valuable source of information for future leaders, engineers, environmentalists, social forerunners and decision makers alike. It also provides a reference guide for both undergraduate and graduate students in engineering, the natural and social sciences, business and economics.

Entrepreneurial Learning City Regions Judith James, Jean Preece, Raúl Valdés-Cotera, 2017-09-21 This book proposes an alternative strategy to improve and sustain prosperity through the creation of an entrepreneurial culture in learning cities or city regions. The edited collection provides insights into how entrepreneurship, education, job creation and social inclusion can be aligned through entrepreneurial learning in the context of territorial development. With rich and varied contributions from a wide field including policy makers, entrepreneurs, an investment banker, leaders of universities and councils, the voluntary sector, scientists, educators and students, it reviews and assesses how learning cities and regions may become more prosperous by investing in the development of entrepreneurial skills throughout lifelong learning. Reinforced by examples on developing and retaining entrepreneurial people, this book contributes to our understanding of how entrepreneurial learning can be fostered in different city and city region contexts. It makes an interesting contribution to the field in terms of mapping out complex issues and testing the practical validity of the concept while also providing rich and insightful case studies centred on the Welsh experience with entrepreneurial learning city regions. The high quality international contributions demonstrate the new worldwide interest in developing an entrepreneurial culture for the benefit of a city or region rather than an entrepreneurial mind set for individual benefit. This fascinating subject will be of interest to many social scientists, policymakers and practitioners. It will be found especially valuable for professionals involved in economic inclusive and sustainable city or regional development.

It surveys the emergence, diffusion, limits, merits and politics of social investment as the welfare policy paradigm for the 21st

century seen through the lens of the life course contingencies of the competitive knowledge economy and modern family hood Featuring contributions from leading scholars in the field the volume revisits the intellectual roots and normative foundations of social investment surveys the criticisms that have leveled against the social investment perspective in theory and policy practice and presents empirical evidence of social investment progress together with novel research methodologies for assessing socioeconomic rates of return on social investment Given the progressive admittedly uneven diffusion of the social investment policy priorities across the globe the volume seeks to address the pressing political question as to whether the social investment turn is able to withstand the fiscal austerity backlash that has re emerged in the aftermath of the global financial crisis
