TIP Sheet

WRITING A CLASSIFICATION PAPER

Classification is sorting things into groups or categories on a single basis of division. A classification paper says something meaningful about how a whole relates to parts, or parts relate to a whole. Like skimming, scanning, paraphrasing, and summarizing, classification requires the ability to group related words, ideas, and characteristics.

Prewriting and purpose

It is a rare writer, student or otherwise, who can sit down and draft a classification essay without prewriting. A classification paper requires that you create categories, so prewriting for a classification paper involves grouping things in different ways in order to discover what categories make the most sense for the purpose you intend.

An important part of creating useful categories is seeing the different ways that things can be grouped. For example, a list of United States presidents may be grouped in any number of ways, depending on your purpose. They might be classified by political party, age on taking office, or previous occupations, but you could just as well, depending on your purpose, classify them by the pets they keep or how they keep physically fit. If your purpose was to analyze presidential administrations, you would group information focusing on the presidents' more public actions—say, cabinet appointments and judicial nominations. On the other hand, if you intended to write about the private lives of presidents, you might select information about personal relationships or hobbies.

Make sure the categories you create have a *single basis* of classification and that the group fits the categories you propose. You may not, for example, write about twentieth century presidents on the basis of the kinds of pets they kept if some of those presidents did not keep pets. The group does not fit the category. If you intend to talk about all the presidents, you must reinvent the categories so that all the presidents fit into it. In the example below, the group is "all U.S. presidents" and the two categories are "those who kept pets and those who did not":

Some U.S. presidents have indulged their love of pets, keeping menageries of animals around the White House, and others have preferred the White House pet-free.

Alternatively, in the following example, the group is "twentieth century U.S. presidential pet-keepers" and the three categories are "dog lovers, cat lovers, and exotic fish enthusiasts."
