The Legacy of a Troubled Past Bernard Cros, Mathilde Rogez, Gilles Teulie, 2022-06-07 Since the advent of democracy in 1994 South Africa has been engaged in an unprecedented exercise of national soul searching torn between the need to lay to rest centuries of racial conflict and the desire to come to terms with its traumatic history This book asks whether the country has begun to turn the corner on the legacy of collective hurt To do so it ranges in scope across 350 years of South African history encompassing the struggle against the apartheid regime the downfall of white supremacy the Truth and Reconciliation Commission and the first 25 years of democracy up to more recent movements such as RhodesMustFall or the inquests into the 2012 Marikana massacre that point to the persistence of traumatic memory in contemporary society The authors assembled here set out to analyse the representation of such memory how it has been woven into narratives recorded preserved and questioned and how issues of individual and collective responsibility have been grafted onto it through the visual arts literature political discourse and public action In focusing on memory along with its derived forms of memorialization collective memory nostalgia or post memory our contributors pose a fundamental question is South Africa finally coming to the end of the post apartheid transition period Do the decades of memory work on racial violence and repression examined here hold out hope for the nation to make peace with its past *Meeting the Challenges to*

Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Global Testing Culture William C. Smith, 2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high

stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences

Education in Cambodia Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars The book focuses on how the system has developed and is making progress Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change a history of weak governance and an anti reform sentiment deriving from a teacher centred and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests
