The Opposite of Hate Sally Kohn,2018-04-10 Brilliantly illustrates the immense and disarming power of changing course and driving not toward division but toward civility and mutual respect Ms

magazine As a progressive commentator on Fox News and now CNN Sally Kohn has made a career out of bridging intractable political differences In this age of dangerous partisan resentment and rising bigotry she decided to investigate hate itself to better consider how we can stop it With her trademark humor and humanity Kohn introduces us to leading researchers and scientists who are exploring the evolutionary and cultural roots of hate She travels to Rwanda to the Middle East and across the United States talking with former terrorists and reformed white supremacists and even sitting down with some of her own Twitter trolls What she discovers is surprising All of us harbor hate but the powerful acknowledgment that we are all in this together can lead us out of the wilderness The opposite of hate is connection

### **A Living History of Immunology Kendall Arthur Smith,2015-11-04**

In the highly competitive world of biomedical science often the rush to publish and to be recognized as first with a new discovery concept or method is lost in the hurly burly of the moment as the maddening crowd moves on to the next new thing One of the great things about immunology today is that it has only become mature as a science within the last half century and especially within the past 35 years as a consequence of the revolution of molecular immunology which has taken place only since 1980

Consequently most of those who have contributed to our new understanding of how the immune system functions are still alive and well and still contributing Thus A Living History of Immunology collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology Accordingly this volume combats revisionist science by those who want to alter history by telling the stories a different way than actually happened In this regard one of the good things about science vs other disciplines is that we have the written record of what was done when it was done and by whom Even so we do not have the complete story or narrative of how and why experiments were done and what made the differences that led to success This volume captures and chronicles some of these stories from the past fifty years in immunology    The Publishers' Circular and Booksellers' Record ,1913    中国图书馆学报 ,2013    **The Publisher** ,1913    **British Books** ,1915    Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1913
