[Law and the Political Economy of Hunger](#) Anna Chadwick, 2019-01-31. This book is an inquiry into the role of law in the contemporary political economy of hunger. In the work of many international institutions, governments, and NGOs, law is represented as a solution to the persistence of hunger. This presentation is evident in the efforts to realize a human right to adequate food as well as in the positioning of law in the form of regulation as a tool to protect society from unruly markets. In this monograph, Anna Chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law's role in the context of hunger as exclusively remedial. The book takes as its starting point claims that financial traders caused the 2007-8 global food crisis by speculating in financial instruments linked to the prices of staple grains. The introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem. Chadwick investigates a number of different legal regimes spanning public international law, international economic law, transnational governance, private law

and human rights law to gather evidence for a counterclaim law is part of the problem The character of the contemporary global food system a food system that is being progressively financialized owes everything to law If world hunger is to be eradicated Chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry *Investopedia's Inside Edge: Economics and financial statement analysis* ,2006 **Transnational Food Security** Emily Webster, Ankita Gupta, Ruth

Ambros, 2020-06-09 Transnational Food Security addresses food security from an international relations political economy and legal perspective analysing the relationship between food security and the environment and climate change trade finance and contracts and the intersection between food and human rights The topic of food concerns one of the most basic and profound aspects of human survival Universal and equal access to food is at the same time ridden with problems of power inequality distribution and implicated in old and new geopolitical conflicts As such food and food security are central to conditions of poverty and hunger development and modernisation transitional justice and rule of law reform around the world As a problem of critique and scholarly inquiry food prompts an inter disciplinary assessment of the nature of food security in the modern world The contributors to this book take us deep into the complexity of food and illustrate the challenges of adequately understanding and approaching questions of food security and food sovereignty in a globally interconnected world Transnational Food Security will be of great interest to scholars of international relations political economy and transnational law The chapters were originally published as a special issue of Transnational Legal Theory Journal [A-Z Common Reference Questions for Academic Librarians](#) Heather Dawson, 2019-11-05 A Z Common Reference Questions for Academic Librarians is a survival guide for frontline library staff to help them find appropriate information quickly whether they are answering questions at a physical help desk or remotely by telephone email or instant messaging service The book will help academic librarians tackle the questions most commonly asked by students academics and researchers A broad cross disciplinary A Z of themes including topics such as literature searching plagiarism and using online resources are covered helping you to address an query confidently and quickly Each topic is split into three sections to guide your response typical questions listing the common enquiries encountered points to consider exploring the issues and challenges that might arise where to look listing annotated UK and international resources in print and online including key organisations scholarly bodies digital libraries statistical data and journal article indexes A Z Common Reference Questions for Academic Librarians updates and expands the author s previous book Know it All Find it Fast for Academic Libraries and includes new sections on blogging and social media text and data mining and data visualization assistive technology resources early career researchers impact measurement including bibliometrics citation analysis and journal rankings academic internet searching LGBT studies Middle East studies project management open access publishing research data management study skills systematic reviews This will be an indispensable day to day guide for anyone working with students academics and
