Leins-Zurmuehle,2021-10-11 The software industry is regarded as one of the most creative and dynamic industries in the world At the same time sheltering software through copyright and patent law has been a major point of contention for the past 40 years This doctoral thesis aims to provide new insights to this discussion Through the use of sociological methodology it supplies the necessary basic scientific research regarding how software is developed and commercialized nowadays Based on these findings it then legally evaluates to what extent copyright and patent law are able to reflect these

structures and determines how an optimal protection scope for computer programs could look like today This doctoral thesis on one hand offers novel insights and points of view on existing legal doctrines It further acknowledges as well as legally qualifies some prevailing trends in the software industry such as Scrum and continuous delivery that have so far been largely unaddressed by copyright and patent law
