Intelligent Information and Database Systems Paweł Sitek, Marcin Pietranik, Marek Krótkiewicz, Chutimet Srinilta, 2020-03-03 This volume constitutes the refereed proceedings of the 12th Asian Conference on Intelligent Information and Database Systems ACIIDS 2020 held in Phuket Thailand in March 2020 The total of 50 full papers accepted for publication in these proceedings were carefully reviewed and selected from 180 submissions The papers are organized in the following topical sections advanced big data machine learning and data mining industry applications of intelligent methods and systems artificial intelligence optimization and databases in practical applications intelligent applications of internet of things recommendation and user centric applications of intelligent systems

Intelligent Production Machines and Systems - 2nd I*PROMS Virtual International Conference 3-14 July 2006 Duc T. Pham, Eldaw E. Eldukhri, Anthony J. Soroka, 2011-07-28 I PROMS 2005 is an online web based conference It provides a platform for presenting discussing and disseminating research results contributed by scientists and industrial practitioners active in the area of intelligent systems and soft computing techniques such as fuzzy logic neural networks evolutionary algorithms and knowledge based systems and their application in different areas of manufacturing Comprised of 100 peer reviewed articles this important resource provides tools to help enterprises achieve goals critical to the future of manufacturing I PROMS is an European Union funded network that involves 30 partner organizations and more than 130 researchers from universities research organizations and corporations State of the art research results Leading European researchers and industrial practitioners Comprehensive collection of indexed and peer reviewed articles in book format supported by a user friendly full text CD ROM with search functionality

Proceedings of 5th International Conference on the Industry 4.0 Model for Advanced Manufacturing Lihui Wang, Vidosav D. Majstorovic, Dimitris Mourtzis, Emanuele Carpanzano, Giovanni Moroni, Luigi Maria Galantucci, 2020-05-15 This book gathers the proceedings of the 5th International Conference on the Industry 4.0 Model for Advanced Manufacturing AMP 2020 held in Belgrade Serbia on 14 June 2020 The event marks the latest in a series of high level conferences that bring together experts from academia and industry to exchange knowledge ideas experiences research findings and information in the field of manufacturing The book addresses a wide range of topics including design of smart and intelligent products developments in CAD CAM technologies rapid prototyping and reverse engineering multistage manufacturing processes manufacturing automation in the Industry 4.0 model cloud based products and cyber physical and reconfigurable manufacturing systems By providing updates on key issues and highlighting recent advances in manufacturing engineering and technologies the book supports the transfer of vital knowledge to the next generation of academics and practitioners Further it will appeal to anyone working or conducting research in this rapidly evolving field

Manufacturing In The Era Of 4th Industrial Revolution: A World Scientific Reference (In 3 Volumes), 2021-01-13 The era of the fourth industrial revolution has fundamentally transformed the manufacturing landscape Products are getting

increasingly complex and customers expect a higher level of customization and quality Manufacturing in the Era of 4th Industrial Revolution explores three technologies that are the building blocks of the next generation advanced manufacturing The first technology covered in Volume 1 is Additive Manufacturing AM AM has emerged as a very popular manufacturing process The most common form of AM is referred to as three dimensional 3D printing Overall the revolution of additive manufacturing has led to many opportunities in fabricating complex customized and novel products As the number of printable materials increases and AM processes evolve manufacturing capabilities for future engineering systems will expand rapidly resulting in a completely new paradigm for solving a myriad of global problems The second technology is industrial robots which is covered in Volume 2 on Robotics Traditionally industrial robots have been used on mass production lines where the same manufacturing operation is repeated many times Recent advances in human safe industrial robots present an opportunity for creating hybrid work cells where humans and robots can collaborate in close physical proximities This Cobots or collaborative robots has opened up to opportunity for humans and robots to work more closely together Recent advances in artificial intelligence are striving to make industrial robots more agile with the ability to adapt to changing environments and tasks Additionally recent advances in force and tactile sensing enable robots to be used in complex manufacturing tasks These new capabilities are expanding the role of robotics in manufacturing operations and leading to significant growth in the industrial robotics area The third technology covered in Volume 3 is augmented and virtual reality Augmented and virtual reality AR VR technologies are being leveraged by the manufacturing community to improve operations in a wide variety of ways Traditional applications have included operator training and design visualization with more recent applications including interactive design and manufacturing planning human and robot interactions ergonomic analysis information and knowledge capture and manufacturing simulation The advent of low cost solutions in these areas is accepted to accelerate the rate of adoption of these technologies in the manufacturing and related sectors Consisting of chapters by leading experts in the world Manufacturing in the Era of 4th Industrial Revolution provides a reference set for supporting graduate programs in the advanced manufacturing area
