

# **Chapter 8 Holes Human Anatomy & Physiology**

## **16th Edition Exam Questions With Complete**

### **Solutions**

Muscles are organs composed of specialized cells that generate forces, allow the types of... - Answer - Walking

- Speaking
- Breathing
- Pumping Blood
- Moving food through the digestive tract

3 types of muscle tissue - Answer - Skeletal

- Smooth
- Cardiac

Structure of a skeletal muscle - Answer Skeletal muscles are composed primarily of muscle fibers with connective tissue, blood vessels, and nerves

Connective Tissue Coverings - Answer endomysium, perimysium, epimysium, fascia

Endomysium - Answer - Surrounds each muscle fiber

- Provide the chemical environment for the exchange of ions for nervous stimulation

Perimysium - Answer Surrounds fascicles within the muscle

Epimysium - Answer Surround the entire muscle

Fascia - Answer - Most superficial layer

- Continuous with the epimysium
- Separates individual muscles

Tendon - Answer - Cordlike

- Fibers may intertwine with those in the periosteum, attaching the muscle to the bone

Aponeurosis - Answer - Broad fibrous sheet

- May attach to bone, to skin, or to the connective tissues of adjacent muscles

Compartment - Answer The space that contains a group of muscles, blood vessels, and nerves, all tightly enclosed by fascia

# Exam Questions On Human Physiology

**Andrew Allott**

## **Exam Questions On Human Physiology:**

**Examination Questions and Answers in Basic Anatomy and Physiology** Martin Caon, 2016-10-11 This book provides two thousand multiple choice questions on human anatomy and physiology separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers to select questions for their next examinations and by students when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition, dietetics, health sciences, and students taking an anatomy and physiology course as an elective.

**Biology for the IB Diploma** Andrew Allott, 2001 This concise guide provides all the content you need for the IB Diploma in Biology at both Standard and Higher Level. Follows the structure of the IB Programme exactly and include all the options. Each topic is presented on its own page for clarity. Standard and Higher Level material clearly indicated. Plenty of practice questions. Written with an awareness that English may not be the reader's first language.

*Examination Questions and Answers in Basic Anatomy and Physiology* Martin Caon, 2018 This second edition provides 2400 multiple choice questions on human anatomy and physiology and some physical science separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end of semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers to select questions for their next examinations and by students when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition, and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.
