Please write answers in your journal

1. As the opening credits roll, the letters A, T, C and G get highlighted in people's names. Describe the significance of these letters.
2. Write the complimentary strand of DNA nucleotide bases for a segment of DNA with nucleotide base sequence: GATTACA.
3. What is the significance of the spiral staircase in Jerome and Vincent's home?
4. Health benefits provided by employers and health insurance companies help pay for their employees' care if they become ill. Explain how a gene test could be *used against* a prospective employee or someone applying for insurance. How were Vincent's genes used against him in the movie?
5. DNA for genetic testing can be collected from a small amount of blood, hair, saliva, and other body fluids. During a party scene in GATTACA, a woman submits a saliva sample from a recent kiss to screen her potential boyfriend/husband's DNA. Do you think that she was violating his rights by doing this without his knowledge, or is she just protecting herself from choosing an unsuitable partner?
6. How much would a DNA test reveal about someone's personality and intelligence?
7. We witnessed Vincent's parents visiting a doctor who specialized in child conception to select for the best traits for his future brother. The parents hoped that his brother would have the best possible chances for a successful life. Some of the traits mentioned in GATTACA included any possibility of inherited diseases, height, and perhaps intelligence. If you and your partner decide to have a child one day and are given the opportunity to select for special traits, would you do so? Why or why not?
8. What extreme measures is Vincent willing to undertake to achieve his dreams?
9. Discuss the real Jerome "Eugene" Morrow. How is his relationship with Vincent symbiotic? In what ways is perfection both a burden and a curse?
10. A *cautionary tale* attempts to warn the viewer about the flaws of an individual or society. What warning is the film attempting to raise? How does the film do this?

Hischak, 2015-04-16 For more than a century, original music has been composed for the cinema. From the early days when live music accompanied silent films to the present in which a composer can draw upon a full orchestra or a lone synthesizer to embody a composition, music has been an integral element of most films. By the late 1930s, movie studios had established music departments and some of the greatest names in film music emerged during Hollywood's Golden Age, including Alfred Newman, Max Steiner, Dimitri Tiomkin, and Bernard Herrmann. Over the decades, other creators of screen music offered additional memorable scores, and some composers such as Henry Mancini, Randy Newman, and John Williams have become household names. *The Encyclopedia of Film Composers* features entries on more than 250 movie composers from around the world. It not only provides facts about these artists but also explains what makes each composer notable and discusses his or her music in detail. Each entry includes Biographical material, Important dates, Career highlights, Analysis of the composer's musical style, Complete list of movie credits. This book brings recognition to the many men and women who have written music for movies over the past one hundred years. In addition to composers from the United States and Great Britain, artists from dozens of other countries are also represented. A rich resource of movie music history, *The Encyclopedia of Film Composers* will be of interest to fans of cinema in general as well as those who want to learn more about the many talented individuals who have created memorable scores. **Surveillance Studies** David Lyon, 2007-07-30 The study of surveillance is more relevant than ever before. The fast growth of the field of surveillance studies reflects both the urgency of civil liberties and privacy questions in the war on terror era and the classical social science debates over the power of watching and classification, from Bentham to Foucault and beyond. In this overview, David Lyon, one of the pioneers of surveillance studies, fuses with aplomb classical debates and contemporary examples to provide the most accessible and up-to-date introduction to surveillance available. The book takes in surveillance studies in all its breadth, from local face-to-face oversight through technical developments in closed circuit TV, radio frequency identification, and biometrics, to global trends that integrate surveillance systems internationally. Surveillance is understood in its ambiguity, from caring to controlling, and the role of visibility of the surveilled is taken as seriously as the powers of observing, classifying, and judging. The book draws on international examples and on the insights of several disciplines: sociologists, political scientists, and geographers will

recognize key issues from their work here but so will people from media culture organization technology and policy studies This illustrates the diverse strands of thought and critique available while at the same time the book makes its own distinct contribution and offers tools for evaluating both surveillance trends and the theories that explain them This book is the perfect introduction for anyone wanting to understand surveillance as a phenomenon and the tools for analysing it further and will be essential reading for students and scholars alike Roger Ebert's Movie Yearbook, 1999 Roger Ebert,1998 Presents detailed descriptions and reviews of virtually every movie that has opened nationally over the past year reports from the major film festivals interviews with important movie figures and essays on the movie world *Public Understanding of Science* ,2005 An international journal of research in the public dimensions of science and technology *Exploring Professional Knowledge and Practices Collaboratively in Problem-based Discussions* Wen-Yu Lee,2004 **Transformation Ethics** Thomas R.
