**Loss Distributions** Robert V. Hogg, Stuart A. Klugman, 2009-09-25 Devoted to the problem of fitting parametric probability distributions to data this treatment uniquely unifies loss modeling in one book. Data

sets used are related to the insurance industry but can be applied to other distributions Emphasis is on the distribution of single losses related to claims made against various types of insurance policies Includes five sets of insurance data as examples **Multiple Imputation for Nonresponse in Surveys** Donald B. Rubin,2009-09-25 Demonstrates how nonresponse in sample surveys and censuses can be handled by replacing each missing value with two or more multiple imputations Clearly illustrates the advantages of modern computing to such handle surveys and demonstrates the benefit of this statistical technique for researchers who must analyze them Also presents the background for Bayesian and frequentist theory After establishing that only standard complete data methods are needed to analyze a multiply imputed set the text evaluates procedures in general circumstances outlining specific procedures for creating imputations in both the ignorable and nonignorable cases Examples and exercises reinforce ideas and the interplay of Bayesian and frequentist ideas presents a unified picture of modern statistics **Robust Statistics** Peter J. Huber,2005-02-04 The first systematic book length treatment of the subject Begins with a general introduction and the formal mathematical background behind qualitative and quantitative robustness Stresses concepts Provides selected numerical algorithms for computing robust estimates as well as convergence proofs Tables contain quantitative robustness information for a variety of estimates **A Handbook of Introductory Statistical Methods** Charles Philip Cox,1987 Some basic concepts and procedures Comparing two groups Some discrete categorized data procedures Linear regression fitting straight lines to x y data Linear correlation measuring relationship Completely randomized experiments two or more groups Contrasts for examining linear combinations of group means multiple comparisons Experiments using randomized block and latin square design Introduction to matrix operations Multiple regression describing data in term of several variables plus chance Multiple correlation **Applied Probability and Queues Theory** Soren Asmussen,1987-05-06 As well as combining a general account of applied probability and stochastic processes with a more specialized treatment of queueing theory this book provides thorough coverage of the general tools of applied probability such as Markov chains renewal theory and regenerative processes **Econometrics Reading Lists** Edward Tower,1990 **Introductory Statistics** Ronald J.
