

Journal: Reflective Practice for Nurse

Introduction

Reflection on practice may be a key talent for nurses. We tend to never learn through memorizing involvement unless begin to study from reflecting on our experiences. Reflective practice is that the cyclic method of internally examining and exploring a problem of concern, triggered by expertise, that clears and clarifies that means in terms of self, existing information, and experience; leading to a modified abstract perceptive and observation. Nurses create excellence among the welfare of their patients by siding 24/7, obtaining information into symptoms, and dealing with the families. My reflective practice is characterized by the ability to look at activities and encounters with the results of making their viable and upgrading nursing knowledge. My reflective journal focused on three incidents mainly effective communication failure, a medication error, and workload in nursing homes that I experienced in my past work settings. Each clinical scenario is a chance for learning. I actually have chosen Gibbs's model of reflection to guide my reflective method. Gibbs's model goes through six important points to assist the reflective method counting illustration of events, feelings, evaluation, analysis, conclusion, and eventually action set up.

Effective Communication Failure

The first incident arose while I used to be working in the post-operative ward wherever the relinquishment was completed inaccurately. The ward had semi-permanent clients; the bulk of them had conditions that were stable. No one had undergone surgical

Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome evaluation and measurement and discussing the complexity of therapy assessment and measurement including the challenge of measuring human behaviour and the impact of factors such as task demand and context including the environment. Methods of data collection e.g. observation, interview, standardised testing and sources e.g. self-report, proxy for collecting information about clients are then reviewed and the main purposes of assessment e.g. descriptive, evaluative, predictive, discriminative presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed. *Bailliere's Study Skills for Nurses and Midwives* Sian Maslin-Prothero, 2010-01-21 Whether you are a first time student or returning to study it can seem very daunting. This book can help you get the most from studying and shows how to make good use of your time and achieve success. This 4th edition has been thoroughly revised and updated. It demonstrates how to develop and build on existing strengths and experiences to get the most out of any course. Using a down to earth and user friendly style it concentrates on what you need to know. It can help you to get the most from reading and lectures, access libraries, use the Internet and databases, develop IT skills, learn through reflection, develop a portfolio, prepare assignments, get the most from placements, activities, reflection points, case studies, annotated further reading, useful websites. This new edition reflects recent changes in nursing and midwifery policy and practice including aspects such as ePortfolios, the European Computer Driving Licence and podcasts. The majority of the chapters have been rewritten with either a student or a practitioner to reflect the need for greater evidence of practice and its importance to midwifery and nursing students. More emphasis on clinical nursing and midwifery practice by relating skills to clinical placements and employment with a new chapter on Clinical Skills. New chapter on Getting ready to study.
