Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development. In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing. This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy. It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis. Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis. However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration. Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives. This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics.

State against Civil Society Cameron Ross, 2017-10-02 Over the period December 2011 July 2013 a tidal wave of mass protests swept through the Russian capital and engulfed scores of cities and regions. These demonstrations came as a great shock to the Russian political establishment. After decades of passive acceptance of the status quo it appeared that civil society was at last awakening. The protests came in the wake of the Arab Spring revolts which toppled authoritarian dictators in Tunisia Egypt and Libya. However by the end of 2013 the number of mass protests in Russia and their size had declined precipitously. President Putin on returning to office in 2012 had quickly regained the upper hand over the protestors. This book examines the reasons for the rise and fall of the mass protests in the Russian Federation. Internationally renowned experts in the field of Russian politics from Russia and the UK provide important new insights into the nature of the mass opposition movement the non systemic opposition its strengths and its weaknesses. A key novel aspect of the study is its focus on the national and regional dimensions of the protest movement and its class and ethnic dimensions. This book was published as a special issue of Europe Asia Studies.
