Patriot Fire Team Equipment Guide

Paul G Markel, 2020-07-19 The Patriot Fire Team Equipment Guide is a follow up to the original PFT Manual The Equipment Guide gives specific and detailed recommendations and guidelines for preparing and equipping a team of like minded individuals to deal with natural and manmade disasters Think of the Patriot Fire Team as a Neighborhood Watch program only instead of whistles and flashlights this neighborhood watch team has rifles and body armor Whistles and flashlights are not going to stop gangs of criminals from looting and burning your neighborhood to the ground The PFT Equipment Guide contains information about recommended rifles and pistols but it includes much more than that Topics Include Personal Protective Gear Traumatic Medicine and First Aid Community Relations Access Denial and Intruder Detection Physical Fitness and Strength Night Operations Field Hygiene and Sanitation and Much More In a world where the State has proven time and time again that it cannot and far too often is unwilling to protect citizens and communities from mob violence looting and vicious criminal attacks the Patriot Fire Team model is more important now than at any time in our nation's history

**The Fire Maker's Manual** Tristan Trouble, 2018-04-23 Book Description This educational resource guide details several aspects of making fire for survival purposes Readers will discover discussions on the elements that are required to make fire such as oxygen fuel and heat They will also learn about the raw materials that are necessary for starting a fire and keeping it going all of which can be found in the wilderness such as tinder kindling and firewood The four most common fire configurations are also mentioned as well as the proper method for laying them out Each of the configurations mentioned can be built by a single person without the need to erect additional structures such as those that would be required for a self feeding fire These configurations are simple and easy to achieve although some do have advantages over others for instance the inverted fire pyramid will burn much longer than the other configurations if built properly This resource guide has been segmented into conventional as well as unconventional methods for making fire The entries in these categories offer brief descriptions on how each item can be used effectively to help get a fire going Conventional ways of making fire will be much

easier than any of the unconventional ways mentioned Many of the entries in the unconventional category are primitive however some of them have been updated to include the use of modern materials to assist with the process Categories in this book are further separated into sections with regards to how a fire is started such as solar based spark based friction based and even firearm based Readers are advised that making fire is an inherently dangerous skill that always includes the risk of injury All safety precautions should be implemented when making a fire in the wilderness to prevent the uncontrollable spread and creation of a wildfire
