**Intellectual Property and the Limits of Antitrust** Katarzyna Czapracka, 2010-01-01 An excellent account of practice on both sides of the Atlantic regarding the intersection of antitrust and intellectual property rights. The author provides a detailed account of the legal discussion in an economics informed manner. A must read as far as I am concerned for practitioners and academicians alike. Petros C Mavroidis Columbia Law School New York US University of Neuch tel Switzerland and CEPR UK. This book examines the growing divergences between the EU and the US in their approach to antitrust law enforcement particularly where it relates to intellectual property IP rights. The scope of US antitrust law as defined in the Supreme Court's decisions in *Trinko* and *Credit Suisse Securities* is much narrower than the scope of EU competition law. US antitrust enforcers have become increasingly reluctant to apply antitrust rules to regulated markets whereas the European Commission has consistently used EU competition rules to correct the externalities resulting from government action. The contrasting approaches adopted by US and EU antitrust enforcers to these issues as with the differences in addressing market dominance have had a profound impact on the scope of antitrust intervention in the IP field. This book provides an in depth analysis of the relevant recent developments on both sides of the Atlantic and identifies the pitfalls of regulating IP through competition rules. With a unique comparative perspective this book will be an invaluable resource for postgraduate students academics and practitioners in IP and competition law.

**Intellectual Property, Competition Law and Economics in Asia** R Ian McEwin, 2011-10-07 This book results from a conference held in Singapore in September 2009 that brought together distinguished lawyers and economists to examine the differences and similarities in the intersection between intellectual property and competition laws in Asia. The prime focus was how best to balance these laws to improve economic welfare. Countries in Asia have different levels of development and experience with intellectual property and competition laws. Japan has the longest experience and now vigorously enforces both competition and intellectual property laws. Most other countries in Asia have only recently introduced intellectual property laws due to the Trade Related Aspects of Intellectual Property Rights TRIPS Agreement and competition laws.
