prominence not just among Spaniards working in the developing science of optometry but among creative writers as well. While Spain is often thought to have taken little notice of the Scientific Revolution, García Santo Tomé tells a different story, one that reveals Golden Age Spanish literature to be in close dialogue with the New Science. Drawing on the work of writers such as Cervantes, Lope de Vega, Calderón de la Barca, and Quevedo, he helps us trace the influence of science and discovery on the rapidly developing and highly playful genre of the novel. Indeed, García Santo Tomé makes a strong case that the rise of the novel cannot be fully understood without taking into account its relationship to the scientific discoveries of the period.

Islamic Literature in Spanish and Aljamiado Gerard Wiegers, 2023-12-21. This important work is an historical study of the Islamic writings in Spanish and Aljamiado (Spanish in Arabic script) of the Muslim minorities in medieval Christian Spain: the Mudejars and Moriscos. On the basis of both Christian sources such as archival documents and the writings of John of Segovia, and Islamic sources in Spanish and Arabic, this book focuses on the life and writings of Yá Gidellí ca. 1450, religious authority of the Mudejar community of Segovia, Castile. Of crucial importance for the history of Islamic Spanish literature, Yá's best known work is a Spanish translation of the Qur'an made at the request of bishop John of Segovia d. 1458. This study follows the early history of Islamic writings in the vernacular, 13th-14th centuries, continues with a description of Yá's writings and biography, and finally deals with his influence on Moriscos in the 16th and 17th centuries.
