 peak performance **Artificial Intelligence, Design Law and Fashion** Hasan Kadir Yilmaztekin,2022-12-30 Artificial
 intelligence AI now infiltrates our culture After a couple of difficult winters AI today is a word on everybody s lips and it
 attracts everyone s attention regardless of whether they are experts or not From Apple s Siri to Amazon s Alexa Tesla s auto
 driving cars to facial recognition systems in CCTV cameras Netflix s film offering services to Google s search engine we live

in a world of AI goods The advent of AI powered technologies increasingly affects people's lives across the globe As a tool for productivity and cost efficiency AI also shapes our economy and welfare AI generated designs and works are becoming more popular Today AI technologies can generate several intellectual creations Fashion is one of the industries that AI can profoundly impact AI tools and devices are currently being used in the fashion industry to create fashion models fabric and jewellery designs and clothing When we talk about AI generated designs we instead focus on the fruits of innovation more best selling apparels more fashionable designs and more fulfilment of customer expectations without paying heed to who the designer is Designers invest a lot of talent time and finances into designing and creating each article of clothing and accessory before they release their work to the public Pattern drafting is the first and most important step in dressmaking Designers typically start with a general sketch on paper add styles elements and colours revise and refine everything and finally deliver their design to dressmakers AI accelerates this time consuming and labour intensive process Yet the full legal consequences of AI in fashion industry are often forgotten An AI device's ability to generate fashion designs raises the question of who will own intellectual property rights over the fashion designs Will it be the fashion designer who hires or contracts with the AI programmer Will it be the programmer Will it be the AI itself Or will it be a joint work of humans and computers And who will be liable for infringement deriving from use of third party material in AI generated fashion designs This book explores answers to these questions within the framework of EU design and copyright laws It also crafts a solution proposal based on a three step test and model norms which could be used to unleash the authors rights holders and infringers around AI generated fashion designs
