Global Warming Hoax :

The Global-Warming Deception Grant R. Jeffrey, 2011-02-08 Global warming s hidden agenda a global socialist government The worldwide effort to combat manmade global warming is history s most far reaching hoax In The Global Warming Deception Grant R Jeffrey documents the orchestrated campaign of political pressure flawed science and falsified data all designed to sell an environmental lie and bring the West to its knees United Nations agencies use the threat of rising ocean levels crop failure expanding deserts and the extinction of species to convince western nations to surrender their sovereignty As these developments play out we see the globalists consolidating their power In The Global Warming Deception you will find proof that Laws and regulations to reduce carbon emissions are designed to destroy the free enterprise system and drain wealth from western nations The religion of eco fundamentalism denies the existence of God and substitutes in His place the worship of the earth The coming economic collapse hastened by global warming laws will lead to international chaos A one world government will be presented as the solution followed by the arrival of the Antichrist Your liberty is at stake Now is the time to learn all you can about the socialist Marxist elite that is advancing the false threat of global warming the most deadly deception in history *The Mythology of Global Warming* Ph. D. Bruce Bunker, 2018-11-07

WANT ACCESS TO SOLID SCIENTIFIC FACTS REFUTING THE INCESSANT MEDIA HYPE SURROUNDING CLIMATE CHANGE THEN THE MYTHOLOGY OF GLOBAL WARMING IS FOR YOU The Mythology of Global Warming is intended to provide the general public with a broad spectrum of scientific and factual information on the subject of Climate Change This book debunks the incessant emotional and largely unsubstantiated claims made by the progressive media and climate scientists that industrial societies such as the United States are destroying our planet due to the use of fossil fuels What causes global warming What is a greenhouse gas What impact do carbon dioxide emissions from fossil fuels actually have on the Earth s climate relative to naturally occurring phenomena Is all ice on Earth really melting and are sea levels rising at a catastrophic rate Are all forms of extreme weather including hurricanes tornadoes floods and droughts increasing dramatically Are polar bears and other life forms being pushed to the brink of extinction Will all of this mayhem cease if fossil fuels are replaced by green renewable energy sources Answers to these questions clearly show that hard facts do not support any of the above dire predictions The science of global warming is indeed settled Global Warming is a myth Global warming proponents can t prove that man is destroying the planet due to global warming but Dr Bunker can prove that we are not He packs a lot of punch in this small package Read it and arm yourself for the great debate Phil Valentine nationally syndicated talk show host of the Phil Valentine Show on Westwood One In the past 20 years I have reviewed two dozen books dealing with Anthropomorphic Global Warming There has not been nor ever will be a more comprehensive and understandable book on this subject which is so critical to the entire world s population Jay Lehr Ph D Science Director The Heartland Institute This is a scholarly work written by a true scientist yet in a way that makes the topic still accessible to the average person

interested in understanding both the science and also the politics of global warming Highly recommended Dr Jennifer Marohasy Senior Fellow Australia s Institute of Public Affairs co author of Climate Change The Facts 2014 Unlike so many others Dr Bunker s book is so much more than a supposition wrapped up in a pretty bow of meaningless numbers If you ve been waiting for a book that gives actual facts in an easily checked form you ve found it G Dedrick Robinson Ph D co author of Global Warming Alarmists Skeptics Deniers A timely and well researched book not only for the thoughtful engaged reader but also for the general public The book is up to date and deals honestly with continuing controversies and uncertainties Dr Sonja A Boehmer Christiansen Department of Geography Hull University Former Editor Energy Environment

The Great Last Days Deception J. B. Hixson,2012-05-16 **Man-Made Global Warming Hoax** Richard Huseman,2010-07-20

The Disclosure of Climate Data from the Climatic Research Unit at the University of East Anglia Great Britain. Parliament. House of Commons. Select Committee on Science and Technology,2010 disclosure of climate data from the Climatic Research Unit at the University of East Anglia Eighth report of session 2009 10 Vol 2 Oral and written Evidence

Conspiracy Theories Aaron John Gulyas,2016-02-08 Narratives based on conspiratorial and paranoid thinking have become increasingly prominent throughout the 20th and 21st centuries From the prosaic to the outlandish conspiracy theories involve aliens and Nazis underground bases and mind control technology They range from sinister tales of malevolent reptilian beings infiltrating our government to fears of the New World Order rounding up patriotic Americans and putting them into internment camps These stories and their underlying concerns have a long history in the U S and have often been bolstered by revelations of real conspiracies and cover ups by private and public entities This book examines conspiracy theories and the narratives constructed by those who believe and propagate them providing a unique view of U S history and highlighting fears both founded and unfounded

Man-Made Global Warming Hoax Richard C. Huseman,2010-07-30 **Rise and Fall of the Carbon Civilisation** Patrick Moriarty,Damon Honnery,2010-10-27 A vast amount has been written on climate change and what should be our response Rise and Fall of the Carbon Civilisation suggests that most of this literature takes a far too optimistic position regarding the potential for conventional mitigation solutions to achieve the deep cuts in greenhouse gases necessary in the limited time frame we have available In addition global environmental problems as exemplified by climate change and global resource problems such as fossil fuel depletion or fresh water scarcity have largely been seen as separate issues Further proposals for solution of these problems often focus at the national level when the problems are global The authors argue that the various challenges the planet faces are both serious and interconnected Rise and Fall of the Carbon Civilisation takes a global perspective in its treatment of various solutions renewable energy nuclear energy energy efficiency carbon sequestration and geo engineering It also addresses the possibility that realistic solutions cannot be achieved until the fundamentally ethical question of global equity both across nations today and also inter generational is fully addressed Such an approach will also involve reorienting the global

economy away from an emphasis on growth and toward the direct satisfaction of basic human needs for all the Earth's people

Rise and Fall of the Carbon Civilisation is aimed at the many members of the public with an awareness of climate change but who wish to find out more about how we need to respond to the challenge It will also be of interest to technical professionals as well as postgraduate students and researchers from the environmental and engineering science sectors

[The Climate Change Hoax Argument](#) C. Paul Smith, 2021-09-30 Environmental extremists claim that a consensus of scientists agree that humans are causing climate change that will cause catastrophic damage to the planet if we do not immediately enact laws and practices to stop it But those who believe this cannot explain scientific reasons to support it In fact the science does not support it not the human caused part not the catastrophic damage part and especially not the assertion that most scientists agree with it The claim that humans are causing catastrophic climate change is a hoax The Climate Change Hoax Argument reveals and discusses the history of the hoax and the science that refutes it Hundreds of renowned scientists from around the world dispute the claims of the IPCC that human caused climate change is an existential threat to the world Here are three such statements

Current alarm over carbon dioxide is mistaken Fears about man made global warming are unwarranted and are not based on good science Dr Will Happer Professor at the Department of Physics at Princeton University and Former Director of Energy Research at the Dept of Energy The IPCC's assertion of consensus in support of its AGW claim is really outrageous and unethical Dr Brilliant AL Briggs climate statistician and Assoc Editor of Monthly Weather Review worst scientific scandal in history When people come to know what the truth is they will feel deceived by science and scientists Dr Kiminori Itoh environmental physical chemist Japan Environmental extremists insist that fossil fuels are destroying the earth by emitting too much CO₂ into the atmosphere But they are wrong Scientific studies confirm that continued use of fossil fuels is not causing global warming is not causing rising sea levels is not causing extreme weather and is not causing more droughts floods wildfires hurricanes or tornadoes Science has exposed the climate change hoax

[The Encyclopedia of Global Warming Science and Technology](#) Bruce Elliott Johansen, 2009 This encyclopedia covers a vast range of topics concepts issues and processes on the subject of global warming such as atmospheric chemistry paleoclimatology biogeography oceanography geophysics glaciology soil science and more

Punch-Drunk on CO₂...Dizzy from Spin Peter Sullivan, 2013 Prior to the 2009 Copenhagen climate conference it became evident that no discernible global warming had occurred since 1998 despite a significant increase in carbon dioxide emissions Consequently the catastrophic man made global warming hypothesis of the Intergovernmental Panel on Climate Change IPCC was conveniently rebranded as climate change This book allows readers with little or no understanding of the issues behind the climate change debate to obtain an appreciation as to why so much doubt and suspicion has been cast over the IPCC and its gold standard climate science IPCC Fourth Assessment Report often referred to as the settled science backed by a consensus of scientists This book reveals that what the public has been led to believe about man made global warming alarmism and about the IPCC often is misleading or

just plain wrong and that the IPCC's climate alarmism is not actually backed by science but rather by shonky predictions from unreliable computer models. It also makes it evident that man-made global warming alarmism has been driven largely by politics and environmentalism using any means possible to justify action to halt catastrophic man-made global warming climate change warming that has not in fact been happening. This book will leave the reader better informed about the IPCC and its climate alarmism and about carbon dioxide, the temperature data, climate model predictions and misleading claims as well as about the efforts of sceptics in revealing why the hypothesis of the IPCC and its alarmist claims are not valid.

Making the Progressive Case David Coates, 2011-06-16 The book presents the conservative and liberal arguments related to the current economic issues faced by the Obama administration including market regulation and green economy.

Climate of Corruption Larry Bell, 2011 A startling and authoritative look at the special interest groups that have corrupted the climate change debate. Running Through the Graveyard Thomas J. Miranda, 2016-07-15 This book contains a number of essays that address the decline of America and the causes of our impending demise. America is racing toward the graveyard of nations and is leaderless; we have lost our moral compass; our government is corrupt to the core and we are reaping the benefits of an entitlement society. Meanwhile we have dumbed down our education so that in many cases high school graduates cannot fill out an unemployment form. High school graduates. Our religious leaders have lost their way and preach more social issues than salvation. The abortuaries have killed over 55 million and counting of our unborn and continue to do so while politicians wring their hands over political correctness. It is the author's hope that the reader will be made aware of these nation-destroying trends and will react to vote for real leaders or this nation is heading for the graveyard of nations. **The Global Warming Scam and Climate Change Superscam**, 2015 **The "Greenhouse Effect" Hoax**, 1989

Understanding the Global Warming Hoax Leo Johnson, 2009 IS GLOBAL WARMING A HOAX Isn't it time you read the facts? The propaganda of man-made global warming has been promoted by those with a political agenda by suppressing the truth and spreading fear. In this effort they have recruited academics, media, environmental groups, governments, the United Nations, even religions. Scientific evidence supporting man-made global warming has now been investigated by scientists and found to be baseless. Examination of the data has revealed the theory of climate change for the propaganda; it is derived from erroneous data, junk science, even scientific fraud. Now for the first time the American people have available to them an honest discussion of man-made global warming and climate change that is easily understood by those without a scientific background. *The Layman's Guide* describes in easily understood language the science refuting claims of climatic catastrophe resulting from the burning of fossil fuels. Using well-documented scientific facts, *The Layman's Guide* exposes the global warming hoax as an authoritarian assault on individual freedom. **The Real Global Warming Disaster** Christopher Booker, 2010-09-01 Booker focuses his attention on the mother of all environmental scares: global warming. **Global Warning** Paul Brown, 2007-10-11 Examines the potential ramifications of long-term climate change on the planet's

ecosystems and human society drawing on scientific research to examine the causes of global warming the economic and political issues involved and ways to help prevent or reduce its effects A Sinister Charade Dan Coffman, 2015-06-07 Jesse Ngata a prominent oceanographer believes global warming is a sinister charade intended to destroy the American way of life His damaging accusations provoke an attempt on his life forcing Jesse to hunt down the climate change criminals before they kill him Jesse's nemesis Basil Radoff is a shadowy Russian agent who was given a fortune and an unconventional mission when the Soviet Union collapsed in 1991 He has spent the past twenty five years convincing global thought leaders that fossil fuel emissions are destroying the Earth's environment Radoff has persuaded the United Nations to ban carbon emissions while continuing his malevolent campaign to cripple the world's energy industry Millions of children are being taught to fear their carbon footprint Billions of dollars are corrupting scientists and regulators around the world Factories are shuttered and rusting Environmental constraints are killing jobs Radoff's global warming hoax may be too entrenched to die America's future hangs in the balance and only Jesse Ngata can stop this diabolical attack
