A Practical Guide to Supporting People with Epilepsy Rebecca Case, Sinead Blake, 2020-05-08 This book is a practical guide with rationale to supporting people with epilepsy It encompasses epilepsy guidance such as NICE 2012 revised 2019 The Equality Act 2010 the children and families act 2014 current evidence based practice and regulatory organisation standards It is predominantly aimed at nurses and student nurses especially those studying learning disability nursing but also residential respite and supported living services schools and family carers to enable them to offer appropriate and evidence based support to people with epilepsy of all ages It is estimated there are approximately 1200 epilepsy related deaths each year in the UK Many of these are considered to be preventable High profile cases have led to an increase in anxiety in people providing services and greater scrutiny of those services by regulatory bodies Over the years the authors have been asked the same questions and witnessed the same misunderstandings and mistakes by people supporting individuals with epilepsy So they looked at the common themes and the resources available It became clear that the information to address these gaps is available but not easily accessible There is lots of information in the public domain however much of it is factual rather than practical This book provides practical information and resources with the focus on what needs to happen how to make it happen and who needs to do it This book is useful for supporting people with epilepsy wherever they live both within and outside the United Kingdom
