### **Digital Culture & Society (DCS)**

**(DCS)** Cindy Kohtala, Yana Boeva, Peter Troxler, 2021-02-26. As DIY digital maker culture proliferates globally, research on these practices is also maturing. Still, particular terminologies dominate beyond their Western contexts and technocultural histories of making are often rendered as over-simplified technomyths that render invisible diverse local practices. This special issue brings together contributions that highlight how historicising plays a role in mythmaking and the creation of social imaginaries. The peer-reviewed articles present cultural, historical perspectives, technology and design histories and historiographies and alternative histories related to postcolonial resistance. The contributions illustrate the relevance of craft to making as a reparative practice after the Salvadoran Civil War and as a leisure activity to spark innovation in mid-century corporate culture; the political-economic background to the diffusion and differentiation of community workshops in contemporary Spain and post-war Germany; and the various aesthetics and politics of technology culture manifestos over the years. The issue features an interview with Peter Harper of the Alternative Technology movement by Simon Sadler, as well as an interview with Felix Holm and Sun Stassen on the antecedents of making and design in South Africa. The special issue is rounded off with six short alternative histories of DIY making, including multiple practices, geographies and temporalities.

**Hacking** Dominik Landwehr, 2014-10      **Gender and Digital Culture** Helen Thornham, 2018-07-27. Gender and Digital Culture offers a unique contribution to the theoretical and methodological understandings of digital technology as inherently gendered and classed. The silences within, through and from the systems we experience every day create inequalities that are deeply affective and constitute very real forms of algorithmic vulnerability. The book explores these lived and mundane algorithmic vulnerabilities across three interrelated research projects. These focus on recent digital phenomena including sexting, selfies and wearables, and particular decision-making systems used in health, education and social services. Central to this book are the themes of irreconcilability and the datalogical. It makes the case that feminism and gender politics have become increasingly irreconcilable with not only long running debates around representation and embodiment but also with conceptions of the technological conceptions of the user and of the systems themselves. In keeping with longstanding feminist scholarship, these irreconcilabilities can be productive and generative: they can be used to interrogate the power politics of digital culture. By studying the lived and routine elements of digital technologies, Gender and Digital Culture asks about the

many convolutions that are held together through the everyday use of these technologies and the implications for how gender and technology are approached discussed and theorised **!Mediengruppe Bitnik** Felicity Lunn, 2017 Mediengruppe Bitnik have made a name for themselves in recent years with spectacular works They bugged the Zurich Opera and programmed a shopping bot to randomly shop for goods on the darknet Mediengruppe Bitnik s first monography is a documentation of their works since 2007 It is published on the occasion of the Geneva Arts Society Prize which they were awarded in 2017 It features two text contributions the first by curator and art critic Aude Launay and the other by art historian and curator Boris Magrini This publication is designed by Christoph Knoth und Konrad Renner and accompanies Mediengruppe Bitnik s solo show at the Soci t des Arts Crosnier Room Geneva 29 September 4 November 2017 English and French text **Jamming the Media** Gareth Branwyn, 1997 In one of the most complete handbooks to mass communication ever cyber culture expert Gareth Branwyn guides the wired and soon to be wired through the use of public access television film video the Internet and more This groundbreaking comprehensive guide is full of easy to follow instructions hands on information practical hints and case studies 2 color throughout **The British National Bibliography** Arthur James Wells, 2009 **Online Access**, 1996 **LEGO MINDSTORMS NXT Hacker's Guide** Dave Prochnow, 2006-12-12 More powerful and intuitive than ever LEGO MINDSTORMS NXT is a new robotics toolset that enables you to build and program all kinds of projects The LEGO MINDSTORMS NXT Hackers guide explores this new generation of LEGO MINDSTORMS providing in a collection of projects how to expertise insider tips and over 500 illustrations to help you become an expert NXT hacker Back cover **The Times Index**, 2013-06 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement
