encompasses theoretical underpinnings Parts Two and Three address applications and directions for further research This updated English language translation not only is an account of the work of Pischinger s successors Heine Otto Bergsman and Felix Perger the three editors of this volume and their many colleagues but notes the positive development of complementary therapies based on this understanding of histology Acupuncture is referenced directly Both in Europe and the States the work of manual therapists including Rolfers cranio sacral therapists and other somatic disciplines have been informed for many years by Pischinger s outsider model of how changes in the EMC register in the central nervous system and the brain and are conveyed back to the periphery and connected organs Heine s exciting recent work shows that the regulation and construction of the ECM have relationships to cybernetic non linear systems and phase transitions
