*New Food Product Development* Holger York Toschka, 2025-03-31. With a new subtitle to reflect its global perspective and a new author, this book continues the mission of earlier editions to describe the stages of food development in detail, beginning with sources of ideas and moving through development, final screening, and introduction into the marketplace. Every chapter contains one or more case studies. New chapters address the tools available for the food industry and manufacturers to select, sharpen, fine tune, and support new food product launches. More attention is given to the influence of global concerns about the deteriorating environment and here particularly the role and responsibility of the food industry and those working on new food products. Key Features: This edition adds the perspective from single product or product range development to the overall portfolio management. This edition explains strategies for successful management of unpredictable, uncertain, and complex conditions in new food product development. NFPD Chapters contain one or more case studies to add pedagogy for students and practical applications for professionals. More focus is given to the role and responsibilities of research and development R&D in innovation management. Two chapters are used to predict the future direction for NFPD. This book can serve as the core textbook for the capstone new food product development course typically found in the food science curriculum and is of equal value to early career food scientists finding themselves in a multidisciplinary team working on the creation of a new food product.

**Resilience and Business Innovation for Sustainability** Abdalmuttaleb M. A. Musleh Al-Sartawi, Abdulnaser Ibrahim Nour, Islam Abdeljawad, 2026-01-01. This book is timely as it explores the double-edged nature of disruptive technologies in providing both challenges and opportunities for businesses in the age of digital transformation. Business resilience has two major forms related to timescales. Both kinds of resilience are identified as key for delivering sustainable development. The opposite is also found to be true. Both are needed to deliver either and to let businesses survive and grow. Sustainability is increasingly a strategic issue for firms seeking sustainable competitive advantage. It has been driven by stakeholder legislative and cost changes including natural resource constraints. Frizzo, Barker et al. 2020. Business resilience has also been of interest recently due to the unpredictable effects of globalization and economic turbulence and in response to changing social limitations on and expectations of companies. The topic of sustainable development has become ubiquitous in the last 30 years. Henderson and Loreau 2023. Yet how to achieve such a goal or whether it is even possible remains a major unknown. This book attempts to provide a platform for researchers and practitioners to discuss sustainability in light of the eruption of disruptive technologies, legislations, regulations, and stakeholder demands. This book's purpose is twofold: it aims to explore artificial intelligence and digital transformation implications for achieving business resilience and business innovation. Second, it aims to cover unique and variety of interdisciplinary topics in the challenges and opportunities of disruptive technologies and how these advanced technologies can be implemented to contribute toward sustainable development goals and sustainability. Consequently, to address the aims of the book, it seeks exploratory, empirical, interpretive, and theoretical research built on either primary or secondary data. The approaches suggested are not exhaustive and can be extended upon by the researchers. In addition, the book contributes toward the UN's sustainable development goals.
