## **Escience Biology Lab Manual:**

**Teaching Lab Science Courses Online** Linda Jeschofnig, Peter Jeschofnig, 2011-02-02 Teaching Lab Science Courses Online is a practical resource for educators developing and teaching fully online lab science courses. First it provides guidance for using learning management systems and other web 2.0 technologies such as video presentations, discussion boards, Google apps, Skype, video, web conferencing, and social media networking. Moreover, it offers advice for giving students the hands on wet laboratory experience they need to learn science effectively including the implications of implementing various lab experiences such as computer simulations, kitchen labs, and commercially assembled at home lab kits. Finally, the book reveals how to get administrative and faculty buy in for teaching science online and shows how to negotiate internal politics and assess the budget implications of online science instruction.

**Introductory Biology 2** Darlene Dickens, 2018-08-29 [Cloud Computing with e-Science Applications](#) Olivier Terzo, Lorenzo Mossucca, 2017-12-19 The amount of data in everyday life has been exploding. This data increase has been especially significant in scientific fields where substantial amounts of data must be captured, communicated, aggregated, stored, and analyzed. *Cloud Computing with e-Science Applications* explains how cloud computing can improve data management in data heavy fields such as bioinformatics, earth science, and computer science. The book begins with an overview of cloud models supplied by the National Institute of Standards and Technology (NIST) and then discusses the challenges imposed by big data on scientific data infrastructures including security and trust issues. Covers vulnerabilities such as data theft or loss, privacy concerns, infected applications, threats in virtualization, and cross virtual machine attack. Describes the implementation of workflows in clouds proposing an architecture composed of two layers: platform and application. Details infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) solutions based on public, private, and hybrid cloud computing models. Demonstrates how cloud computing aids in resource control, vertical and horizontal scalability, interoperability, and adaptive scheduling. Featuring significant contributions from research centers, universities, and industries worldwide, *Cloud Computing with e-Science Applications* presents innovative cloud migration methodologies applicable to a variety of fields where large data sets are produced. The book provides the scientific community with an essential reference for moving applications to the cloud.
