**Rockefeller** Jacob Nordangård, 2024-04-02 Why would the first family of oil so ardently support environmental climate research and activism Join author and researcher Jacob Nordangård as he uncovers the whole sordid truth The Rockefeller

family is one of the richest in the world Yet why would the family that made the world dependent on oil fund environmental and climate research since the 1950s help shape climate policy measures since the 1980s and supported climate activism since the 1990s *Rockefeller Controlling the Game* is the thrilling and paradoxical story of one of the world's most influential global players Through its top position in American business close contacts with the White House and with their immense financial power as one of the world's leading private research funders the Rockefellers have been able to anchor the climate issue both scientifically and politically Yet what is the reasoning behind doing so Author and researcher Jacob Nordang *rd* follows the family from the founding of Standard Oil and the Rockefeller Foundation up through the aftermath of the Paris Agreement with the declaration of the Fourth Industrial Revolution in January 2016 to the present day Nordang *rd*'s in depth research includes the large quantities of new material recently made available on the Internet as well as the Rockefeller Foundation's own annual reports Nordang *rd*'s main focus is the Rockefeller family's involvement in climate research and politics but the actions and motives of some of their allies are also explored as well as the family's influence on the development of modern medicine family planning agriculture art architecture behavioral science information technology and politics The Rockefeller family's utopian dream of a perfect world will have serious consequences for the survival of the human species and life as we know it The Rockefeller Foundation's stated mission to promote the well being of humanity throughout the world has a dark flipside as Nordang *rd* will prove the Rockefeller family's long standing battle against climate change contains elements of sophisticated propaganda techniques futurism and New Age philosophy aiming at a complete transformation of the whole earth system including economy ecology culture and even humanity itself

**Ready to Lead?** Robin Niblett,2009 This report by Director of Chatham House Dr

Robin Niblett draws on Chatham House's international expertise and contacts to offer an in depth analysis of President Obama administration's ambitions to renew US leadership in the world. The report explores how the Obama administration can promote US global leadership at a time when many of the pillars of its international role have been weakened. Looking at how the US will need to craft new ways of using its unique power and capacity to influence others the report's key conclusions are as follows: America needs to change how it uses its power by sharing leadership where partners have as much or more to offer; America needs to focus less on its opponents and more on supporting its friends and allies in Europe, Latin America, the Middle East and Asia; America needs to place less emphasis on individual leaders and parties and more on governance and political processes.
