The Place of Information Technology in Management and Business Education Ben-Zion Barta, Peter Juliff, 1997-01-31 The power of modern information systems and information technology. ISIIT offers new opportunities to rethink at the broadest levels existing business strategies, approaches and practices. Over the past decade, IT has opened up new business opportunities led to the development of new strategic IS and challenged all managers and users of ISIIT to devise new ways to make better use of information. Yet this era which began with much confidence and optimism is now suffering under a legacy of systems that are increasingly failing to meet business needs and lasting fixes are proving costly and difficult to implement. Further, how can we be certain that IS is adequately adding value to the organisational bottom line? On the other hand, IS executives and professionals who are responsible for creating, managing and maintaining the organisation's systems

are worried about the preparedness of general managers to cope with the growth in new technologies and systems They see IT having a polarising effect on general managers it either bedazzles or frightens them Davenport 1994 119 **Managing Information Technology in a Global Economy** Information Resources Management Association.
