At the end of each exercise set is a systematic cumulative review. Just as model cars represent key features of real cars, geometry represents key features of God's creation. Model cars represent the shape and scale of real cars even though they are too small to be used for transportation. Likewise, geometry shows the relationships among measurements such as lengths and areas as well as the reasons for such relationships. Thus, geometry is a mathematical model.

The additional topics in Chapters 8, 9 and 10 provide enrichment materials and enable the book to be used for a five unit one semester course or for a two quarter course. These three chapters are sufficiently independent so that any of them can be used separately.
