

## Case studies

We're all interested in what makes people tick, how they think, act and interact with others. That's why studying undergraduate Psychology – the science of human behaviour – is interesting in its own right.

Studying a degree in Psychology will enable you to develop a wide range of sought after transferable skills. The knowledge and skills gained allows you to take advantage of a variety of job opportunities in areas such as education, human resources, commercial industry, management, advertising and marketing, research, the health professions, counselling and social services. (Some of these require further professional and/or specialised training). Here are some case studies from OU Psychology graduates which demonstrates the value of OU study, both in enabling a career change and the opportunity to become a professional psychologist.

It was the year 2000 when I very proudly received my Open University BSc (Hons) Psych at the Birmingham Symphony Hall. This was the springboard into the career that I really wanted and led me into an MSc and Post Masters qualification for Chartership, working as an Associate Psychologist and researcher with a local university before setting up a private practice. It is now five years since I provided my case study for the OU, how the time really does fly. Throughout my studies and professional practice, my deep regard for the OU and pride at having been a part of such an academy has never waned. Indeed, I believe that in the current climate the OU is needed more than ever.

My private practice: MY Counselling & Psychology Services has been running for 8 years now. A strong network of providers and colleagues has developed during this time, which helps greatly in terms of support and practically in coping with the waiting list that I have to manage. I have been involved with bringing together a group of professional, highly trained and experienced mind and body therapists at a holistic centre in Essex and this has become a thriving and busy community.

In 2010 I decided to undertake a Professional Doctorate in which I am exploring the cultivation and integration of self-compassion into personal and professional practice. One of my supervisors recently reminded me about the work of Mead and I found myself diving into my OU course books – which I won't part with – it was a happy reunion.

I have also trained as a teacher in Mindfulness Based Stress Reduction and Mindful Self-compassion, which has deeply enriched how I work and what I can offer to my clients. My work and continuing education has taken me all over the UK, Europe and in November 2014 to Boston in the US to present the initial stages of my Doctoral research.

Self-care is central to being able to do my job and keeping well and so I make sure that this

Gualberto Cremades, Lauren S. Tashman, 2016-05-20 Global Practices and Training in Applied Sport Exercise and Performance Psychology offers case analysis as a vehicle to address issues and experiences in the application of sport exercise and performance psychology SEPP and the supervision training of individuals to become professionals in the field A follow up to *Becoming a Sport Exercise and Performance Psychology Professional* 2014 this book features a discussion of real world case

examples which highlight various aspects of professional practice as well as supervision and training. Professionals from around the world including the United States and Canada Europe Asia Africa and Australia share diverse experiences providing a uniquely in depth global perspective. The case studies contained in the book were selected to provide insight into specific elements of applied practice and supervision training through a global lens as well as demonstrate the value of incorporating case analysis and reflection into one's training and continued professional development. Case analysis is an essential part of learning and instruction. Beyond educating the reader about theories and research on related topics in the field case analysis allows for more complex levels of learning including analysis synthesis and evaluation of diverse scenarios. In Part I of this book the cases focus on applied SEPP practice. Part II is comprised of cases that focus on training and supervision. This book is essential reading for graduate students and neophyte professionals in the field for whom it is critical to learn how to effectively apply knowledge to real world sport exercise and performance psychology scenarios. In addition the book is a useful resource for seasoned and expert practitioners and supervisors who can use case analysis as a means of continuing their professional development.
