### SONA 2022 REACTION PAPER

On July 25, 2022, President Ferdinand Marcos Jr. delivered his State of the Nation Address in Batasang Pambansa Quezon City. His State of the Nation Address lasted one hour and fourteen minutes and I was on a roller coaster of emotions while watching the said address. Marcos began his speech by outlining his plans for the Philippines as the country's 17th president in the coming year. He set the tone for how the President will govern the country during his tenure. He also outlines the state's road map for the next six years in terms of the most important factors to consider. It will be a confirmation of the platforms he established during his campaign.

During Marcos' speech, I was only fascinated and cheering. I'm very impressed with how his first State of the Nation Address speech went. Throughout his speech, there was never a monotonous or uninteresting moment I felt. I was ecstatic. Excitement about the next agenda item he will tackle, the next words he will spit out, and even the quotations he will deliver. His message was clearly sent from the first to the last words he uttered. Once he said, "Samahan niyo at pakigggan ang ating bansa at ang mga plano at mithiin natin bilang isang sambayanan para sa mga susunod na taon." That quotation makes me feel comfortable because we chose the right President who will manage and protect us in our country.

Personally, I believed that his presidency would leave an indelible mark. Thus, President Marcos focuses on agriculture as well as economic issues, and we Filipinos benefit from this. He stated in his speech that there was no lockdown to better manage our economy. He prefers medications, food supplies, and water. He did everything he could to show us that we could have a better Philippines during his tenure. Furthermore, he clearly delivered his word for us to understand and suitable for what we primarily require these days. There was no reason for us to have a much better country if he can do his job well as our President.

*Autobiographical Memory, Narrative Identity, and Mental Health* Shamsul Haque, Jorge Javier Ricarte, Laura Jobson, Fabrice Berna, 2022-07-04    **Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents** Amon Rapp, Maurizio Tirassa, Tom Ziemke, 2019-10-10 Cognitive sciences have been involved under numerous accounts to explain how humans interact with technology as well as to design technological instruments tailored to human needs. As technological advancements in fields like wearable and ubiquitous computing, virtual reality, robotics, and artificial intelligence are presenting novel modalities for interacting with technology, there are opportunities for deepening, exploring, and even rethinking the theoretical foundations of human technology use. This volume, entitled *Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents*, is a collection of articles on the impacts that novel technologies are producing on individuals. It puts together 17 works spanning from research on social cognition in human-robot interaction to studies on neural changes triggered by Internet use that tackle relevant technological and theoretical issues in human-computer interaction, encouraging us to rethink how we conceptualize technology, its use and development. The volume addresses fundamental issues at different levels. The first part revolves around the biological impacts that technologies are producing on our bodies and brains. The second part focuses on the psychological level, exploring how our psychological characteristics may affect the way we use, understand, and perceive technology, as well as how technology is changing our cognition. The third part addresses relevant theoretical problems, presenting reflections that aim to reframe how we conceptualize ourselves, technology, and interaction itself. Finally, the last part of the volume pays attention to the factors involved in the design of technological artifacts, providing suggestions on how we can develop novel technologies closer to human needs. Overall, it appears that human-computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape.

**Managerial Decision-Making From the Perspectives of Behavioral Science and Neuroscience** Wuke Zhang, Peter Ping Li, Jie Yu, Liuting Diao, Senqing Qi, 2023-03-03    *Conceptualizations of Africa* Abdul Karim Bangura, JP Afamefuna Ifedi, 2025-02-27 This book discusses how Africa has been understood and defined across various academic fields. Building on the influential works of Valentin Yves Mudimbe and more recent studies by Axel Fleisch and Rhiannon Stephens, this book bridges previous limitations by offering a comprehensive interdisciplinary analysis. Each chapter examines the conceptualization of Africa within a specific discipline, balancing local and global perspectives, blending competing viewpoints and providing suggestions for future research. The book will be essential for students, scholars, and researchers interested in a better understanding of the diverse and complex narratives that shape our knowledge of Africa and its intellectual heritage.
