**The New Phenomenal Gerson Therapy Cookbook** Christine Louise,2023-08-22 Gerson therapy also called Gerson diet Gerson regimen and Gerson method was developed by German doctor Max Gerson in the 1920s and 1930s First developed to treat his migraines Gerson adapted his plan to address tuberculosis and later other conditions including cancer Gerson therapy involves a strict and specific organic diet nutritional supplements and the use of enemas This book will discuss the theory behind Gerson therapy what it entails with numerous cooking recipes Gerson therapy proposes that people with cancer have too much sodium in their bodies compared to potassium and that a buildup of toxins in the body causes changes in cell metabolism leading to cancer The goal

of Gerson therapy is to detoxify the body and stimulate metabolism so that the body can heal itself Followers of Gerson therapy must adhere to a strict low sodium organic fruit and vegetable diet While a diet with limited sodium and plenty of fruit and vegetables is usually healthy the diet involved with Gerson therapy is taken to an extreme Developed Gerson therapy in the 1920s and 1930s to address migraines then tuberculosis It is now primarily aimed at people with cancer

**Cancer and the New Biology of Water** Thomas Cowan,2019-09-24 A groundbreaking look at the role of water in living organisms that ultimately brings us closer to answering the riddle of the etiology of and therapy and treatment for cancer When President Nixon launched the War on Cancer with the signing of the National Cancer Act of 1971 and the allocation of billions of research dollars it was amidst a flurry of promises that a cure was within reach The research establishment was trumpeting the discovery of oncogenes the genes that supposedly cause cancer As soon as we identified them and treated cancer patients accordingly cancer would become a thing of the past Fifty years later it's clear that the War on Cancer has failed despite what the cancer industry wants us to believe New diagnoses have continued to climb one in three people in the United States can now expect to battle cancer during their lifetime For the majority of common cancers the search for oncogenes has not changed the treatment We're still treating with the same old triad of removing surgery burning out radiation or poisoning chemotherapy In Cancer and the New Biology of Water Thomas Cowan MD argues that this failure was inevitable because the oncogene theory is incorrect or at least incomplete and based on a flawed concept of biology in which DNA controls our cellular function and therefore our health Instead Dr Cowan tells us the somatic mutations seen in cancer cells are the result of a cellular deterioration that has little to do with oncogenes DNA or even the nucleus The root cause is metabolic dysfunction that deteriorates the structured water that forms the basis of cytoplasmic and therefore cellular health Despite mainstream medicine's failure to bring an end to suffering or deliver on its promises it remains illegal for physicians to prescribe anything other than the standard of care for their cancer patients no matter how dangerous and ineffective that standard may be and despite the fact that gentler more effective and more promising treatments exist While Dr Cowan acknowledges that all of these treatments need more research Cancer and the New Biology of Water is an impassioned plea from a long time physician that these promising treatments merit our attention and research dollars and that patients have the right to information options and medical freedom in matters of their own life and death
