If you read only one book on educating children this should be the book With a warm informative voice Bauer gives you the knowledge that will help you flex the educational model to meet the needs of your child San Francisco Book Review Our K 12 school system isn't a good fit for all or even most students It prioritizes a single way of understanding the world over all others pushes children into a rigid set of grades with little regard for individual maturity and slaps disability labels on differences in learning style Caught in this system far too many young learners end up discouraged This informed compassionate and practical guidebook will show you how to take control of your child's K 12 experience and negotiate the school system in a way that nurtures your child's mind emotions

and spirit Understand why we have twelve grades and why we match them to ages Evaluate your child's maturity and determine how to use that knowledge to your advantage Find out what subject areas we study in school why they exist and how to tinker with them Discover what learning disabilities and intellectual giftedness are how they can overlap how to recognize them and how those labels can help or hinder you Work effectively with your child's teachers tutors and coaches Learn to teach important subjects yourself Challenge accepted ideas about homework and standardized testing Help your child develop a vision for the future Reclaim your families priorities including time for eating together playing imagining traveling and yes sleeping Plan for college or apprenticeships Consider out of the box alternatives **Appkit Developer -**
