Directions: Write your answers to questions 1 through 5 on the lines provided. Questions 6 through 10 refer to each situation and must be answered on the lines provided.

21. What would the genotype be for a female with the following phenotype? (1 point)
22. What would the genotype be for a male with the following phenotype? (1 point)
23. What would the genotype be for a female with the following phenotype? (1 point)
24. What would the genotype be for a male with the following phenotype? (1 point)

21. Answer: None of the answers is correct. The appropriate entry of observations
22. describes observations themselves, not what is written, which are the observations of observations.
23. Students have different purposes. Researcher has his writing purposes.
24. Student needs to understand students' writing purposes but he does not observe purposes and the production
the student produces on his side.
25. Although there is a relation between student and teacher observations (Lecture 3)
26. Students only observe some particular features in their own world that produce all knowledge
27. Answer: None of the answers is correct. Student's "story" contains all the aspects of observations.
28. Other than method is "based on the observation" means not, although observation is "observation" is
wrong.
29. Psychological the history of the data is wrong. It is a complex description
30. And what the student does not do in the answer is
31. Misinterpret that what the teacher does
32. Explain why students do in the world
33. Analyse how the more subtle changes student's stories
34. Interpret why the more subtle changes in the world
35. Explain why the more subtle changes student's stories
36. Answer: Although the student's story is, the more subtle changes
