

Product features:

- Radio-controlled, automatic time setting and clock change for Daylight Savings.
- Perpetual calendar
- Reception Control
- Worldwide time zone (clock change)
- Up to 3x longer battery life, depending on usage
- LCD display with day/date display in German or English

1. Initial Setup (important for correct setting of radio-controlled watch)

Due to factory magnetic fields the hand position may differ from the internally saved radio time. The initial setup serves to resynchronise the hands with the internally saved radio time.

- Press and hold SET and MODE for 5 seconds. The second hand stops and the display shows H.P.
- Now press and hold MODE until the second hand starts to rotate. Wait until all three hands rotate to just before a full hour (e.g. 5:00). Press MODE again to stop the hands from rotating. Now press MODE stepwise as required until the second hand aligns with 12:00. All three pointers should now align to a full hour (e.g. for 5:00 – minutes – and second hand on 12, hour hand on 5).
- Press SET. The LCD display shows a flashing numeral.
- Press MODE until the LCD display shows the specific number for the shown time of the hands (e.g. "5" for 5:00).
- Press SET.

The initial setting is now complete. The watch should now receive the radio signal and set itself to the correct time. This process will take up to 5 minutes.

2. Checking Radio Reception

The radio clock will attempt to receive the DCF77 radio-control signal every day between 2:00 and 3:00. However, interference with reception might occur due to thunderstorms or electrical disturbance.

- Press SET.
- If the second hand rotates to 12:00, the reception attempt was successful.
- If the second hand rotates to 6:00, the reception attempt was not successful.
- In both cases the LCD display shows the remaining seconds running down and the watch returns to the saved radio time.

3. Manual Radio Reception Check

A manual call for the transmitter is always possible, but might fail due to bad weather conditions or electronic devices in the vicinity.

- Press MODE and hold for 5 seconds.
- The LCD display shows the signal reception. The process will take 3 – 5 minutes.

4. Setting of LCD Display

The LCD display can show either the day of week or the date.

- Press MODE to choose the desired option.

5. Language of Index in LCD Display

The displayed information is either in German or English.

- Press MODE and hold until the day of week is set.
- Press SET and hold for 2 seconds until the display shows GE (German) or EN (English).
- Press MODE to choose.
- Press SET to store.
- The day of week is now displayed in the chosen language.

6. Manual time mode (no RC mode)

If the watch is being used outside of DCF77 radio-signal, the time has to be set manually, because the radio signal cannot be assigned.

- When the LCD display shows the date, press SET and hold for 2 seconds.
- The LCD display shows HUR for 3 seconds and then the internally saved hour.
- Press MODE stepwise to set the new LCD displayed hour (24h).
- Press SET to store the settings.
- The LCD display now shows MIN for 3 seconds and then the internally saved minutes.
- If needed set the minutes by pressing MODE stepwise.
- Press SET to store the settings. The pointers will now adjust to the new local time.
- For returning to the Central European Time, please follow point 1 (initial setup).

7. This product complies with the EMV directives of the EU

8. Water Resistance as per DIN 8319

The water resistance specification of your watch is imprinted on its base and is in its new condition subject to following do's and don'ts:

Fried, 2022-01-12. 2022 Hardcover Reprint of 1961 Second Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition software. As The New York Times wrote after his death, Henry B. Fried was widely acknowledged as the dean of American watchmakers. In the revised 1961 edition of his classic book The Watch Repairer's Manual, reprinted here, Fried addresses topics important to contemporary watch repairers, such as self-winding watches, waterproofing, calendar watches, alarm wristwatches, and chronographs. The Watch Repairer's Manual also includes a fine visual dictionary of exploded views in isometric, which are very helpful for ordering watch parts. One of the few modern books available on the techniques of watch repair, and certainly the most esteemed, The Watch Repairer's Manual is outstanding for its sequence of presentation and its many useful illustrations, including enlarged details of alarm and self-winding watches. The consummate craftsman and master of details, Fried himself created the illustrations. From teaching others, Fried has learned that if you have a good understanding of how and why the mechanisms work, you will become better at fixing any problems you face, often without needing to consult a book. The Watch Repairer's Manual provides helpful background material, such as full descriptions of the main divisions of the modern watch mechanisms, including the purpose and function of each unit. Complete directions for cleaning and overhauling a watch movement for casing. A section devoted to general repairs and troubleshooting. For anyone interested in watch repair, this volume will serve as a working manual, a reference manual, and even a course of study. Assuming little previous knowledge on the part of the reader, Fried provides complete and clear detail on each operation. The Watch Repairer's Manual should be of great value to the student, hobbyist, watch collector, and instrument maker. Henry B. Fried wrote and illustrated 14 books, many pamphlets, and hundreds of articles on horology, the science of timepieces. The first American to receive the Silver Medal of the British Horological Institute, he served as president of the New York City Horological Society and the New York State Watchmakers Association, and vice president of the old Horological Institute of America. He taught and lectured on horology and served as an industry consultant. He also was a consultant for the Random House Dictionary and the Merriam Webster Dictionary.
