Southeast Asian Migration Khatharya Um,Sofia Gaspar,2015-10-01 Southeast Asia has long been a crossroad of cultural influence and transnational movement but the massive migration of Southeast Asians throughout the world in recent decades is historically unprecedented. Dispersal compelled by economic circumstance political turmoil and war engenders personal familial and spiritual dislocation and provokes a questioning of identity and belonging. This volume features original works by scholars from Asia America and Europe that highlight these trends and perspectives on Southeast Asian migration within and beyond the Asia Pacific region. Adopting an interdisciplinary approach with contributions from sociology political science anthropology and history and anchored in empirical case studies from various Southeast Asian countries it extends the scope of inquiry beyond the economic concerns of migration and beyond a single country source or destination and disciplinary focus. Analytic focus is placed on the forces and factors that shape migration trajectories and migrant incorporation experiences in Asia and Europe the impact of migration and immigration status on individuals families and institutions on questions of equity inclusion and identity and the triangulated relationships between diasporic communities the sending and receiving countries. Of particular importance is the scholarly attention to lesser known populations and issues such as Vietnamese in Poland children and the 1 5 generation immigrants health and mental consequences of state sponsored violence and protracted encampment ethnic media and the challenges of both transnational parenting and family reunification. In examining the complex and creative negotiations that immigrants engage locally and transnationally in their daily lives it foregrounds immigrant resilience in the strategies they adopt not only to survive but thrive in displacement.
