

3.2

Amylase is an enzyme that hydrolyses (breaks down) starch into sugars in humans.

Siyabonga conducted an investigation where a solution of amylase was mixed with a starch suspension. The mixtures were kept in water baths at different temperatures for 15 minutes each.

At the end of the time, the samples were analysed to find out how much sugar was produced. The results of the above investigation are recorded in the table below:

Temperature ($^{\circ}\text{C}$)	0	10	20	30	40	50	60	70
Units of sugar	10	36	65	90	90	30	4	2

3.2.1

In this investigation identify the:

(a) Independent variable

(b) Dependent variable

3.2.5

Based on the results, what is the range for the optimum temperature for the action of amylase?

Life Science Grade 10 Memo For 18 September 2014

Karen J. Maschke, Michael K. Gusmano

Life Science Grade 10 Memo For 18 September 2014:

Debating Modern Medical Technologies Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors. Medical technologies often promise to extend and improve quality of life but come with many questions: Are they safe and effective? Are they worth the cost? When should they be allowed on the market, and when should Medicare, Medicaid, and private insurance companies be required to pay for drugs, devices, and diagnostic tests? Using case studies of disputes about the value of mammography screening, genetic testing for disease risk, brain imaging technologies to detect biomarkers associated with Alzheimer's disease, cell-based therapies, and new expensive drugs, Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies, physicians, and patient advocates. *Debating Modern Medical Technologies: The Politics of Safety, Effectiveness, and Patient Access* reveals stakeholders differing values and interests regarding patient choice, physician autonomy, risk assessment, government intervention in medicine, and technology assessment and scientific innovation as a driver of national and global economies. It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients. **Bulletin of the Atomic Scientists**, 1995-09

Uncover the mysteries within Crafted by is enigmatic creation, Embark on a Mystery with **Life Science Grade 10 Memo For 18 September 2014** .
