## Life Science Grade 12 March 2014 Essay Question:

**Weird** Olga Khazan,2020-04-07 Learn why the concept of weird is being reclaimed and turned into a badge of honor used to show how being different culturally socially physically or mentally can be a person's greatest strength. Most of us have at some point in our lives felt like an outsider sometimes considering ourselves too weird to fit in. Growing up as a Russian immigrant in West Texas Olga Khazan always felt there was something different about her. This feeling has permeated her life and as she embarked on a science writing career she realized there were psychological connections between this feeling of being an outsider and both her struggles and successes later in life. She decided to reach out to other people who were unique in their environments to see if they had experienced similar feelings of alienation and if so to learn how they overcame them. *Weird* is based on in person interviews with many of these individuals such as a woman who is professionally surrounded by men a liberal in a conservative area and a Muslim in a predominantly Christian town. In addition it provides actionable insights based on interviews with dozens of experts and a review of hundreds of scientific studies. *Weird* explores why it is that we crave conformity how that affects people who are different and what they can do about it. First the book dives into the history of social norms and why some people hew to them more strictly than others. Next Khazan explores the causes behind and the consequences of social rejection. She then reveals the hidden upsides to being weird as well as the strategies that people who are different might use in order to achieve success in a society that values normalcy. Finally the book follows the trajectories of unique individuals who either decided to be among others just like them to stay weird or to dwell somewhere in between. Combining Khazan's own story with those of others and with fascinating takeaways from cutting edge psychology research *Weird* reveals how successful individuals learned to embrace their weirdness using it to their advantage.

**Killer Apps** Jeremy Packer,Joshua Reeves,2020-02-28 In *Killer Apps* Jeremy Packer and Joshua Reeves provide a detailed account of the rise of automation in warfare showing how media systems are central to building weapons systems with artificial intelligence in order to more efficiently select and eliminate military targets. Drawing on the insights of a wide range of political and media theorists Packer and Reeves develop a new theory for understanding how the intersection of media and military strategy drives today's AI arms race. They address the use of media to search for enemies in their analyses of the history of automated radar systems the search for extraterrestrial life and the development of military climate science which treats the changing earth as an enemy. As the authors demonstrate contemporary military strategy demands perfect communication in an evolving battlespace that is increasingly inhospitable to human frailties necessitating humans replacement by advanced robotics machine intelligence and media systems.
