

## EARTH AND LIFE SCIENCE

### Life

#### What Qualifies Something as Living?

1. **Movement** – most animals move. Movement from one place to another is no diagnostic of life. The criterion of movement is neither necessary nor sufficient.
2. **Sensitivity** – almost all living things respond to stimuli. Plants grow toward light, and animals retreat from fire. Not all stimuli produce responses.
3. **Death** – all living things die, while inanimate do not. Unless one can detect life, death is a meaningless concept.
4. **Complexity**

Earth is much older than life.

**Earth** - 4.5 billion years old.

**Oldest Fossil** - 3.5 billion years old. "Based on radioactive decay studies of rocks.

*It took the Earth nearly 1 billion years to cool enough for the first life form to appear.*

### THEORIES ON THE ORIGIN OF LIFE

1. **Extraterrestrial Origin** – life originated on another planet outside our Solar System. Life was then **carried on Earth on a meteorite or an asteroid** and colonized Earth. "Not proven.

2. **Panspermia** – GK, "seeds everywhere" a.k.a. Cosmozoic Theory. The "seed" of life exists all over the universe and can be propagated through space.

- Contains **extremophile organisms** or organisms that survive in extreme conditions that survive in extreme conditions, life then had to come to earth in the **form of resistant spores**.
- Proposed by **Richter in 1865 and supported by Arrhenius**
- Life had to come to earth from other planets of the universe in the form of **resistant spores**
- British astronomers **Fred Hoyle** and **Chandra Wickramasinghe** proposed that:
  - > interstellar dusts contain organic compounds.
  - > comets, which are largely made of water (ice), carry bacterial life across galaxies and protect it from radiations damage along the way.
  - > the 2005 impact mission to Comet Tempel 1 discovered a mixture of organic and clay particles inside a comet

#### 2005 DEEP IMPACT MISSION

- Deep impact was a NASA space probe launched from Cape Canaveral Air Force Station at 18:47 UTC on January 12, 2005
- It was **designed to study the interior composition of the comet tempel 1 (9P/Tempel)**, by releasing an impactor in the comet.
- At 05:02 UTC on **July 4, 2005**, the **impactor successfully collided with the comet's nucleus**.

#### Variations of Panspermia Theory

1. **Lithopanspermia (interstellar panspermia)** - impact-expelled rocks from a planet's surface serve as transfer vehicles for spreading biological material **from one solar system to another**
2. **Ballistic Panspermia (interplanetary panspermia)** - impact-expelled rocks from a planet's surface serve as transfer vehicles for spreading biological material **from one planet to another** within the same solar system (*planet to planet*)
3. **Directed Panspermia** - intentional spreading of seeds of life to other planets be an **advanced extraterrestrial civilization** or the intentional **spreading of the seeds of life from Earth to other planets by humans**. *There is a chance that humans at some point in our space explorations, may intentionally transport microorganisms on manned craft or unmanned probes to other planetary bodies.*

Academic Pipeline Programs Curtis D. Byrd, Rihana S. Mason, 2021-05-28 Academic pipeline programs are critical to effectively support the steady increase of diverse students entering the academy. Academic Pipeline Programs: Diversifying Bachelor's to the Professoriate describes best practices of successful academic government and privately funded pre-collegiate, collegiate, graduate, and postdoctoral faculty development pipeline programs. The authors explore 21 hallmark academic pipeline programs using their THRIVE index: Type, History, Research, Inclusion, Identity, Voice, and Expectation. The final chapter of the book offers information for using and starting similar programs. The appendix offers an interactive Geographic Information System (GIS) mapped database of programs using the THRIVE index. This book will equip parents, high school counselors, college advisors, faculty, department chairs, and higher education administrators to identify academic pipeline programs that fit their needs. Readers will also learn about how academic pipeline programs are situated within an institutional or organizational change model.

The Handbook of Applied Communication Research H. Dan O'Hair, Mary John O'Hair, 2020-04-24 An authoritative survey of different contexts, methodologies, and theories of applied communication. The field of Applied Communication Research (ACR) has made substantial progress over the past five decades in studying communication problems and in making contributions to help solve them. Changes in society, human relationships, climate, and the environment, and digital media have presented myriad contexts in which to apply communication theory. The Handbook of Applied Communication Research addresses a wide array of contemporary communication issues, their research implications in various contexts, and the challenges and opportunities for using communication to manage problems. This innovative work brings together the diverse perspectives of a team of notable international scholars from across disciplines. The Handbook of Applied Communication Research includes discussion and analysis spread across two comprehensive volumes. Volume one introduces ACR, explores what is possible in the field, and examines theoretical perspectives: organizational communication, risk and crisis communication, and media, data, design, and technology. The second volume focuses on real-world communication topics such as health and education, communication, legal, ethical, and policy issues, and volunteerism, social justice, and communication activism. Each chapter addresses a specific issue or concern and discusses the choices faced by participants in the communication process. This important contribution to communication research explores how various communication contexts are best approached, addresses balancing scientific findings with social and cultural issues, discusses how and to what extent media can mitigate the effects of adverse events, features original findings from ongoing research programs and original communication models and frameworks, presents the best available research and insights on where current research and best practices should move in the future. A major addition to the body of knowledge in the field, The Handbook of Applied Communication Research is an invaluable work for advanced undergraduate students, graduate students, and scholars.
