Life Science Paper 1 Examplar November 2014:

God, Freud and Religion Dianna T. Kenny, 2015-03-05 Choice Essential Read Did God create man or did man create God In this book Dianna Kenny examines religious belief through a variety of perspectives psychoanalytic cognitive neuropsychological sociological historical and psychiatric to provide a coherent account of why people might believe in God She argues that psychoanalytic theory provides a fertile and creative approach to the study of religion that attempts to integrate religious belief with our innate human nature and developmental histories that have unfolded in the context of our socialization and cultural experiences Freud argued that religion is so compelling because it solves the problems of our existence It explains the origin of the universe offers solace and protection from evil and provides a blueprint about how we should live our lives with just rewards for the righteous and due punishments for sinners and transgressors Science on the other hand offers no such explanations about the universe or the meaning of our lives and no comfort for the unanswered longings of the human race Is religion a form of wish fulfilment a collective delusion to which we cling as we try to fathom our place and purpose in the drama of cosmology Can there be morality without faith Are science and religion radically incompatible What are the roots of fundamentalism and terror theology These are some of the questions addressed in God Freud and Religion a book that will be of interest to psychoanalysts psychologists and psychotherapists students of psychology psychoanalysis philosophy and theology and all those with an interest in religion and human behaviour Dianna Kenny is Professor of Psychology at the University of Sydney Australia She is the author of over 200 publications including six books

Edinburgh Companion to the Politics of American Health Sophie A. Jones, Martin Halliwell, 2022-06-17 By emphasising the plurality of health experiences and balancing national and transnational perspectives with the lived realities of diverse communities this groundbreaking collection expands far beyond biomedical conceptions of health Together the contributors take a multi layered view of the politics of US healthcare by examining it from historical cultural medical sociological legal ethical and environmental perspectives Chapters consider major health institutions and the federal policies that guide them the intersection between health and social movements the contours of health and illness with respect to race gender sexuality age and region and the US's often conflicted role in global health governance

Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones no care decisions are more profound than those made near the end of life Unfortunately the experience of dying in the United States is often characterized by fragmented care inadequate treatment of distressing symptoms frequent transitions among care settings and enormous care responsibilities for families According to this report the current health care system of rendering more intensive services than are necessary and desired by patients and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life Death is not a strictly medical

event Ideally health care for those nearing the end of life harmonizes with social psychological and spiritual support All people with advanced illnesses who may be approaching the end of life are entitled to access to high quality compassionate evidence based care consistent with their wishes Dying in America evaluates strategies to integrate care into a person and family centered team based framework and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families The findings and recommendations of this report will address the needs of patients and their families and assist policy makers clinicians and their educational and credentialing bodies leaders of health care delivery and financing organizations researchers public and private funders religious and community leaders advocates of better care journalists and the public to provide the best care possible for people nearing the end of life The Oxford Handbook of Moral Development Lene Arnett Jensen,2020-01-24 The nature of people's moral lives the similarities and differences in the moral concepts of individuals and groups and how these concepts emerge in the course of human development are topics of perennial interest In recent years the field of moral development has turned from a focus on a limited set of theories to a refreshingly vast array of research questions and methods This handbook offers a comprehensive international and up to date review of this research on moral development Drawing together the work of over 90 authors hailing from diverse disciplines such as anthropology education human development psychology and sociology the handbook reflects the dynamic nature of the field Across more than 40 chapters this handbook opens the door to a broad view of moral motives and behaviors ontogeny and developmental pathways and contexts that children adolescents and adults experience with respect to morality It offers a comprehensive and timely tour of the field of moral development *Annals of the Carnegie Museum* ,2013

The Uncanny Valley Hypothesis and Beyond Marcus Cheetham,2018-05-02 A field of theory and research is evolving around the question highlighted in the Uncanny Valley Hypothesis How does high realism in anthropomorphic design influence human experience and behaviour The Uncanny Valley Hypothesis posits that a very humanlike character or object e.g. robot prosthetic limb doll can evoke a negative affective i.e. uncanny state Recent advances in robotic and computer graphic technologies in simulating aspects of human appearance behaviour and interaction have been accompanied therefore by theorising and research on the meaning and relevance of the Uncanny Valley Hypothesis for anthropomorphic design Current understanding of the uncanny idea is still fragmentary and further original research is needed However the emerging picture indicates that the relationship between humanlike realism and subjective experience and behaviour may not be as straightforward as the Uncanny Valley Hypothesis suggests This Research Topic brings together researchers from traditionally separate domains including robotics computer graphics cognitive science psychology and neuroscience to provide a snapshot of current work in this field A diversity of issues and questions are addressed in contributions that include original research review theory and opinion papers *Climate Change and Cities* Cynthia Rosenzweig,William D. Solecki,Patricia Romero-Lankao,Shagun Mehrotra,Shobhakar Dhakal,Somayya Ali

Ibrahim,2018-03-29 The Urban Climate Change Research Network s Second Assessment Report on Climate Change in Cities ARC3 2 is the second in a series of global science based reports to examine climate risk adaptation and mitigation efforts in cities The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns The primary purpose of ARC3 2 is to inform the development and implementation of effective urban climate change policies leveraging ongoing and planned investments for populations in cities of developing emerging and developed countries This volume like its predecessor will be invaluable for a range of audiences involved with climate change and cities mayors city officials and policymakers urban planners policymakers charged with developing climate change mitigation and adaptation programs and a broad spectrum of researchers and advanced students in the environmental sciences
