Rejecting the radical individualism of the neoliberal era many artistic projects promote collectivity and togetherness in navigating challenges and constructing shared futures. The Art of Collectivity is about how one such creative social program deployed this approach in service of a post neoliberal vision. Focusing on a national social circus initiative launched by a newly elected Ecuadorean government to help actualize its citizens revolution the book explores the intersection between global cultural politics participatory arts collective health and social transformation. The authors include scholars and practitioners of community arts humanities social sciences and health sciences from the Global North and Global South. Sensitive to hierarchical binaries such as research practice north south and art science they work together to provide a multifaceted analysis of the way cultural politics shape policy pedagogy and aesthetic sensibilities as well as their socio cultural and health related effects. The largest study of social circus to date combining detailed quantitative qualitative and arts based research. The Art of Collectivity is a timely contribution to the study of cultural policies critical pedagogies collective art making and community development.
