Phoma: Diversity, Taxonomy, Bioactivities, and Nanotechnology Mahendra Rai, Beata Zimowska, György János Kövics, 2021-11-19 The book covers the taxonomy diversity bioactivity and nanotechnology involved in the study of the genus Phoma It presents the most recent molecular taxonomic approach secondary metabolites different bioactivities combating microbial threats and its use in nanotechnology from a basic research to an applied perspective Expert contributors provide the latest research and applications to present thorough coverage of this important genus in human and plant pathology and the disease management *iCEER2014-McMaster Digest* Mohamed Bakr, Ahmed Elsharabasy, 2014-11-18 International Conference on Engineering Education and Research Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Collaborating for Inquiry-Based Learning Virginia L. Wallace, Whitney N. Husid, 2016-12-05 This newly updated and expanded second edition of Collaborating for Inquiry Based Learning explains effective IBL scaffolding and the school librarian's role as the lead in the collaborative process of inquiry based teaching Want to learn how to easily put inquiry theory into practice in your school library This newly revised and expanded practical resource links pedagogical theory research and practical application of Inquiry Based Learning IBL An important resource for school librarians classroom teachers and school library preparation programs this thoroughly updated second edition of Collaborating for Inquiry Based Learning explores Inquiry Based Learning in greater depth and addresses new educational insights Readers will learn the new research model PLAN and understand how the steps Prepare Learn Analyze and New Discoveries define a deliberative metacognitive process that

offers simplicity and flexibility This step by step guide moves new and experienced educators seamlessly from assessment of students needs and prior knowledge through formative and summative assessments to reflection It offers practical applications for immediate use by educators with students and makes it clear why the school librarian is ideally suited to be the lead in the collaborative process of inquiry based teaching This comprehensive guide to IBL is appropriate as a main text or supplementary reading for courses in instructional design and curriculum

quality of teaching These evaluations can be understood as providing a customer centric portrait of quality and when used as the sole arbiter of teaching performance they do not instil confidence in the system of evaluation by academic teaching staff Providing peer perspectives as counterpoint whether in a developmental or summative form goes some way to alleviating this imbalance and is the impetus for the resurgence of interest in peer review and observation of teaching This book seeks to recognise cases of peer review of teaching in Higher Education to affirm best practices and identify areas that require improvement in establishing local national and international benchmarks of teaching quality     **Sessional Papers** Great Britain.
