That is one reason why the number of these animals is decreasing continuously. In 2007 13 rhinos were poached in South Africa while in 2015 the number increased to 1175 rhinos. This Matura Paper deals with problems of rhino poaching in South Africa. It poses into the question if it is still possible to see rhinos in the future and examines what should be done to save this species from extinction. Therefore 5 theses have been stated which consist of political, financial, protection measures and enlightenment of local and Asian people. Thereby an interview has been conducted with a conservationist in addition to research in a volunteering project in South Africa regarding these theses. The results prove the problems already stated. If there are no changes in one of these problems the rhino doubtfully has a future.      Analysis of Rhino Poaching in KwaZulu-Natal, South Africa, 2011      **Study Guide for Understanding Life Sciences** T.
