Life Orientation Research June 2015 Question Paper:

Rethinking Children as Consumers Cyndy Hawkins, 2016-09-13 Children are significant consumers of services such as health welfare educational institutions and the environment. Alongside this the marketization of childhood means that children are exposed to advertising and marketing through a wide range of media on a daily basis. Examining key debates on children's power, status and citizenship issues, it considers the wider implications of how consumerism impacts on children's health, well-being and life chances. This timely book explores childhood and consumerism through four key strands: children as consumers of services; children as consumers of space; the link between citizenship and consumption; the influences of the marketization of childhood. *Rethinking Children as Consumers* will be essential reading for students, researchers, practitioners and policy makers who are interested in the topic of consumerism across early childhood, childhood, youth and society.

Joined-Up Psychological Approach to Health, Well-Being, and Rehabilitation Dónal G. Fortune, Elaine L. Kinsella, Orla M. Muldoon, 2016-09-07 Health and well being is best understood in terms of a combination of biological psychological and social factors. But how social is the biopsychosocial model when applied to mental health and rehabilitation? Psychology has traditionally viewed health as being determined by individual behavior. An integrative psychological approach is required to draw understanding from sociology, social psychology and politics to consider how wider systemic structural and contextual factors impact on health behavior and outcomes. This e-book is dedicated to examining collective and community approaches to well-being and rehabilitation. In particular, the articles contained within this e-book are seeking to understand how social integration, social groups, social identity and social capital influence health, well-being and rehabilitation outcomes.

This is the first book on the history, influences, and impact of the Werkstatt für Photography Photography Workshop founded by the Berlin photographer Michael Schmidt at the Volkshochschule Kreuzberg in 1976. In the midst of the Cold War, the Werkstatt initiated a democratic field of experimentation beyond the pale of traditional vocational and political institutional standards. Those same years witnessed the establishment of infrastructures in West Germany that paved the way for the emancipation of photography as an art form. Documenta 6 (1977) the first photo galleries and photography journals and a number of pathbreaking exhibitions in Berlin, Hanover, and Essen played important roles in that process. This book presents the story of German photography in the 1970s and 80s, its international ties, its protagonists, and its networks.
