Grasp the importance of operating effectively as a whole school team. **Contents** Chapters Introduction Chapter 1 How the PLC Process Supports Collaborative Teams Creating a Foundation of Learning Chapter 2 What We Want Our Students to Know and Be Able to Do Building a Curriculum Chapter 3 What We Want Our Students to Know and Be Able to Do Determining Essential Standards and Mapping Curriculum Chapter 4 How We Know Students Have Learned Unwrapping Standards and Setting Goals Chapter 5 How We Know Students Have Learned Designing Assessments Chapter 6 How We Respond When Some Students Do or Do Not Learn Conducting Data Discussions and Progress Monitoring Chapter 7 How We Respond When Some Students Do or Do Not Learn Planning Instruction Epilogue **WHOLE** Rex Miller, Bill Latham, Kevin Baird, Michelle Kinder, 2020-02-25 A shocking statistic in education reveals that 70% of K-12 teachers work under chronic stress. This revolutionary new book explains how removing stress from the classroom holds the key to improving education. The book also explains what administrators, teachers, parents, and communities can do to help accomplish a stress-free classroom. For years the expert voices said disengagement was the crucial issue behind poor educational environments and results. Naturally, only massive reform could fix it. But what if the enormous restructuring and expenditures attacked the wrong problem? MindShift, an organization that reframes tired and clogged conversations, pushed the old conclusions off the table and started fresh. They gathered diverse leaders in education, leadership, neuroscience, architecture, and wellness in working forums around the nation. These pivotal meetings produced **WHOLE**, a game-changing approach to education. This book captures the story and details of how the system can be remade for real and lasting benefits to everyone. With the authors' expertise, the book exposes the exhausted and antiquated thinking that led to the present crisis. But **WHOLE** also proposes a new era of disruptive change that can produce happier, healthier, and more successful education for the 21st century. The book introduces the outliers, tells the stories, and presents the roadmaps to why teachers should be seen as high-performance athletes requiring time for recovery and preparation. How

schools can become field hospitals combining learning with healing Why space matters how redesigning and refurnishing schools can eliminate stress and produce learning environments that are more open and inviting Ways to properly integrate schools within communities building honest relationships increasing social capital and achieving transparency that increases success Packed with real life examples new research and solutions that you can introduce to your own schools students and communities **WHOLE** shows us how to move schools from the age of stress and insecurity to an age of true educational flourishing

Being Human in STEM Sarah L. Bunnell, Sheila S. Jaswal, Megan B. Lyster, 2023-07-03 For all STEM faculty chairs administrators and faculty developers who work to support students learning and thriving in STEM especially those students who have felt unwelcome and unsupported in their past STEM experiences this book offers sustainable strategies that are now being widely adopted to create inclusive environments in undergraduate STEM classes and programs Further this book presents a framework for partnering with students to collaboratively envision how STEM can be a space that fosters a sense of belonging for and promotes the success of all individuals in STEM This book presents the Being Human in STEM Initiative or HSTEM as a model for challenging the assumptions we make and how we communicate to students about who belongs and who can thrive in STEM This work arose out of a time of conflict at Amherst College A four day sit in protesting in support of the Black Lives Matter movement and bringing attention to related experiences of exclusion and marginalization that minoritized students experienced on campus What emerged from that conflict has been transformative for the college its students and for its faculty and staff In this book the authors share how the HSTEM course came into being offer a course overview readings and resources for developing an HSTEM course at your own institution provide recommendations for evaluating the multi level impact of inclusive change initiatives and profile models of how the HSTEM course has been adapted at colleges and universities across the country In addition to providing a road map for developing your own HSTEM course the authors articulate ways that you can make any course or institutional structure more inclusive through active listening and validation and through reflective practice and partnership to progressively make incremental and sustainable changes in STEM education Through listening and reflecting the model facilitates uncovering the disconnects that can impede inclusivity in our classrooms and laboratories While the authors offer a proven process and model for change originally motivated by the urgent need to respond to students demands

they recognize that larger institutional culture shifts require the identification and commitment to common values a shared sense of purpose in the work of change and the provision of agency and resources to individuals tasked with making change happen How might we shift institutional STEM culture The HSTEM model provides one solution By reflecting on our own lived experiences and identities engaging with the literature on the factors that enhance and limit full inclusion in STEM and partnering with students to identify actionable ways to bring about sustainable change in our scientific communities we can all work towards creating a more inclusive and human STEM ecosystem Each chapter opens with a set of guiding reflective questions to help you connect these ideas frameworks and strategies to your own teaching and institutional context While each chapter builds on the previous ideas and frameworks the book can also be used as a resource to identify a just in time strategy to address particular questions you may have about making your teaching more inclusive The appendices offer an array of Facilitator Guides each of which outlines a student endorsed exercise based on the pedagogical literature that can foster a sense of belonging and inclusion in your classrooms and laboratory spaces

Making Sense of Learning Norman Reid,Asma Amanat Ali,2020-08-25 This textbook brings together findings from global research on teaching and learning with an emphasis on secondary and higher education The book is unique in that the content is selected in an original way and its presentation reflects the most recent research evidence related to understanding The book covers and presents themes that are based tightly on worldwide research evidence scrupulously avoiding opinion or any dependence on the personal experience of the authors The book starts by reflecting on educational research itself The four chapters that follow relate the story of the research that shows how all humans learn and the variations within that framework These chapters offer a tight framework that underpins much of the rest of the text The next four chapters look at the way school curricula are organised and how the performance of learners can be assessed They summarise the research evidence related to thinking skills and consider the importance of practical teaching This is followed by two chapters that draw from the extensive social psychology research on attitude development as it applies in education and then by two chapters that summarise the research related to major issues of controversy the performativity agenda and the issue of quality One chapter looks at the place of statistics in education The next two chapters look at the evidence that can support or undermine many typical education beliefs or myths and mirages Finally the last chapter brings it all together and looks into the future pointing to some areas where future research is likely to be helpful based on current knowledge
