 Edward Mickolus,2019-03-07 This comprehensive worldwide study catalogs terrorist attacks in 2018 during which the  
 Islamic State continued its decline from a quasi government commanding territory the size of the United Kingdom to a more  
 traditional terrorist network controlling just 1000 square miles Yet IS still boasts 30 000 adherents in Syria and Iraq with  
 many others awaiting plans for attacks in their home nations Organized by region and country this volume covers domestic  
 and international incidents around the world outlining significant trends The author offers several indicators of what to  
 watch in the coming years The single year format allows readers access to the most up to date information on terrorism while  
 geographic focus more easily facilitates regional comparison **Time's Witness** Michael Malone,2001 Homegrown

 Simmons,1997 This is the author s fifth chronology on international terrorism The volumes cover the period from 1968  
 through 1995 and provide the most comprehensive picture of international terrorist activities ever published As with the last  
 four volumes this one also contains a bibliography on the key literature on the topic Terrorism in the period covered by this  
 volume 1992 to 1995 followed many of the trends seen in the previous two decades While most people recall the spectacular  
 events those were infrequent due in part to the security cooperation of like minded governments Most terrorist events were  
 low level bombings with few casualties But the period saw the advent of a new type of terrorist non group Composed of small  
 loosely organized bands of zealots with widespread contacts they have made combatting terrorism all the more difficult

Given the problems of tracing groups and uncovering patterns this volume will be invaluable for scholars and researchers involved with contemporary nationalism fundamentalist groups and international terrorism     The Washington Post Index
